James Thivierge, Chairman  
Board of Selectmen  
Town of Amesbury  
Friend Street  
Amesbury, MA 01913

Dear Chairman Thivierge and Members of the Board:

New Hampshire Yankee has developed the Seabrook Plan for Massachusetts Communities (SPMC) to compensate for non-participation in Seabrook emergency planning by state and local officials.

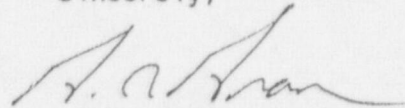

The SPMC will become operational to the extent required when Seabrook Station goes above 5% power. In the unlikely event of an actual emergency, the resources of the SPMC would be mobilized to protect the health and safety of people living in, working in or visiting your community.

New Hampshire Yankee would like, once again, to offer you the opportunity to review the Seabrook Plan for Massachusetts Communities, and to participate in planning, training opportunities, as well as drills and exercises.

If New Hampshire Yankee can be of assistance to you in strengthening your emergency response capabilities, answering any questions you might have regarding emergency plans for Seabrook Station, or if you require another set or access to a set of the SPMC, please contact Sally Everett at 603-474-9521.

We look forward to working with you.

Sincerely,

G. R. Gram  
Executive Director of  
Emergency Preparedness  
and Community Relations

November 23, 1988

Mr. Robert J. Boulay, Director  
Commonwealth of Massachusetts  
Civil Defense Agency and Office  
of Emergency Preparedness  
400 Worcester Road  
Framingham, MA 01701

Dear Mr. Boulay:

As indicated in the April 24, 1987 letter from A. Callendrello to you, Seabrook Station has in place a system for the notification of the Commonwealth of any declared emergencies that occur during zero power operation. Upon receipt of NRC authorization to conduct low power testing, requirements for emergency response for Seabrook Station will be in effect in accordance with the NRC Final Rule on "Emergency Planning and Preparedness Requirements for Nuclear Power Plant Fuel Loading and Low Power Testing (copy attached)."

In accordance with the onsite emergency response plan, the Commonwealth would be notified using a State Notification Fact Sheet if an emergency classification (e.g. Unusual Event) is declared at Seabrook Station. This State Notification Fact Sheet contains utility classification levels, recommended protective actions and follow-up information (Forms E.R.2.0B and 2.0C). The fact sheet forms have been revised slightly and copies are attached.

New Hampshire Yankee has in place a fully trained Offsite Response Organization to provide any and all resources needed to implement an emergency response in the Commonwealth. Should an emergency be declared, in addition to the initial notification by Seabrook Station, the Offsite Response Organization (ORO) will contact appropriate Commonwealth authorities in order to coordinate the response of ORO with the Commonwealth.

We are prepared to discuss all aspects of the New Hampshire Yankee ORO and Seabrook Plan for Massachusetts Communities and provide training regarding ORO operations at your convenience. It is requested that you brief your staff, other Commonwealth agencies and local governments regarding the above.

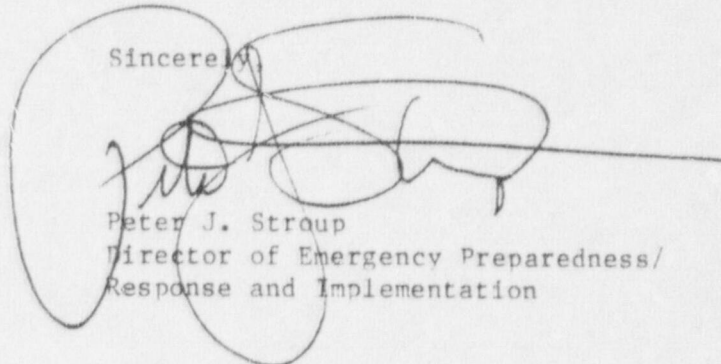

Mr. Robert J. Boulay

Arthur DiMauro-Director  
Harbor School Admin. Office  
26 Rolf's Lane  
Newbury, MA 01951

Dear Mr. DiMauro,

You were recently contacted by a member of our Emergency Planning Department to discuss planning for your treatment facilities at River Rd., Pleasant Valley Rd, 24 Rolf's Lane and 28 Rolf's Lane in the event of a Radiological Incident at Seabrook Station. You indicated to us at that time that you do not wish to participate in the emergency planning process at Seabrook Station.

Enclosed for your review is a draft plan which details the actions to be implemented in case there is a Radiological Incident at Seabrook Station. This plan outlines the means of notification, the provision for transportation in case of an evacuation and the reception center/host facilities accommodations that will be available for your use.

Any facility specific information which may appear in the plan is based on the best available information we have been able to gather from state and local agencies.

If you would review the plan and provide us with any changes or comments you may have we will be pleased to make the appropriate changes. We would still like to meet with you to discuss the plan and offer you the opportunity to participate in training, drills and the federally evaluated exercise.

If you have any questions concerning the plan or wish to participate in training, drills or exercise please contact Sheila Hertel at (603-474-9521), ext. 4128 or Millie Munroe at (603-474-9521) ext. 3804.

Your consideration of this matter is appreciated.

Sincerely,

Public Service of New Hampshire

New Hampshire Yankee Division

January 15, 1988

Director Robert Boulay  
Massachusetts Civil Defense Agency  
400 Worcester Road  
Framingham, Massachusetts 01701

Dear Director Boulay,

New Hampshire Yankee is in the process of preparing for a Federally observed exercise of the emergency response organization which would respond to a radiological emergency at Seabrook Station. We have tentatively selected the week of 23 May, 1988 as a target date for this exercise.

To support an exercise in this time frame it will be necessary to submit to the cognizant Federal authorities proposed exercise objectives and a summary of the extent of play for each participating emergency response organization no later than 25 January, 1988. To facilitate the development of the materials required for this submittal New Hampshire Yankee is requesting you and the appropriate members of your staff to schedule and attend a coordination meeting with New Hampshire Yankee, prior to 23 January, 1988, at a place and time of your convenience.

Upon completion of this meeting we expect to have finalized the proposed exercise objectives for the Massachusetts Emergency Response Organization and an outline of its extent of play. To assist you in preparing for this meeting and to serve as a starting point for discussions I have enclosed a draft of proposed exercise objectives for your state's response organization and a suggested meeting agenda.

If by January 23, no response to this request is received, New Hampshire Yankee must assume continued non-participation in the radiological emergency response planning and exercise process by the Commonwealth of Massachusetts and will make alternate preparation for the exercise in accordance with recent Nuclear Regulatory Commission rule changes.

If you have any questions or if I can be of any assistance to you in this matter please contact me at (603) 474-9521, ext. 4399.

Sincerely,

George R. Gram

INTRA-COMPANY BUSINESS MEMO

Subject SEABROOK STATION ORIENTATION TRAINING

From J.A. MACDONALD                      District                      Date                      DECEMBER 14, 1987

To                      GOOD FAITH FILE                      Reference

On December 8 and 9, 1987, the orientation program shown in the attached outline (Attachment 1) was conducted for representatives of the principal offsite state organizations that have roles in response to an emergency at Seabrook Station. The program was attended by those shown in Attachment 2.

It is our desire to involve representatives from the Commonwealth of Massachusetts in orientation programs such as this. Actually, in January of 1986, a similar two day program was conducted and that one was attended by representatives of both the Massachusetts Civil Defense Agency and Department of Public Health. Such attendance at this time was not expected because of the changed participation policy of the Governor of Massachusetts, but it was nonetheless offered to the MDPH. Although definitely interested, the offer had to be declined.

A handwritten signature in cursive script, appearing to read 'J.A. Macdonald'.
