NUCLEAR SECURITY TRAINING AND  
QUALIFICATION PLAN REVISION

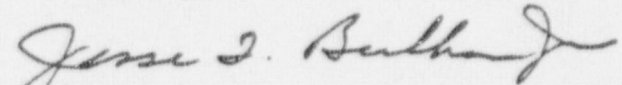

Gentlemen:

In accordance with the requirements of 10CFR50.54(p)(2), Georgia Power Company (GPC) hereby submits a report of changes made to the Nuclear Security Training and Qualification Plant (TQP) for Plant Hatch Units 1 and 2. This revision of the TQP is intended to: 1) make task elements correspond to the events described in Appendices C and D of the Physical Security Plan, 2) provide flexibility in the type of annual requalification testing which is required, and 3) make editorial corrections.

GPC has determined that the changes do not decrease the effectiveness of the TQP. Enclosure 1 describes the changes and provides a determination that the changes do not decrease the effectiveness of the program. Enclosure 2 contains the revised TQP pages.

Should you have questions in this regard, please contact this office at any time.

Sincerely,

*for*
