SUBJECT: TECHNICAL EVALUATION REPORT FOR OFFSITE DOSE CALCULATION
MANUAL (ODCM) REVISION 9 - PRAIRIE ISLAND NUCLEAR GENERATING
PLANT UNITS 1 AND 2

By letter dated August 28, 1987, Northern States Power Company submitted Revision 9 to the Offsite Dose Calculation Manual (ODCM) for the Prairie Island Nuclear Generating Plant Unit Nos. 1 and 2. The revised Manual has been reviewed for the NRC in its entirety by our contractor EG&G Idaho Inc. The results of this review are contained in their Technical Evaluation Report (TER) EGG-PHY-8073 a copy of which is enclosed.

We agree with our contractor's statement that the Prairie Island ODCM Revision 9 specifies methods that are in general consistent with NRC guidelines and is acceptable. However, in the conclusion of the TER, there are a listing of a number of discrepancies and suggestions, some typographical in nature and others dealing with technical issues that need to be addressed. You are therefore requested to consider our comments and issue a revision to the ODCM to reflect our comments within 150 days from the date of the letter.

This completes our efforts under TAC Nos. 73076 and 73077.

Sincerely,

Dominic C. Dilanni, Project Manager
Project Directorate III-1
Division of Reactor Projects III, IV, V
and Special Projects, NRR
