Re: Application for License to Export Enriched UF6
for the Mihama Unit No.3, Region 16

Dear Ms. Wright,

Please find enclosed our application in triplicate for license to export slightly enriched UF6. This material will be used for the fabrication of fuel assemblies and ultimately loaded into Mihama Plant No.3 (Region 16) owned by the Kansai Electric Power Co., Inc.

The country of origin of the uranium is Australia.

The relevant enriched UF6 will be delivered at the U.S. D.O.E. Portsmouth Enrichment Plant in Piketon, Ohio. After being exported to Japan, it will be converted to UO2 powder, pelletized and fabricated into fuel assemblies by Mitsubishi Nuclear Co., Ltd. or Nuclear Fuel Industries, Ltd.

As to the validity of the export license, we wish to have a two year period from the date of issuance.

With regard to sampling, we request that two (2) P-10 tube samples be taken from each parent cylinder. These samples should be delivered to us c/o Teledyne Isotopes for independent analysis. We also request that the Nuclear Audit and Testing Company witness the weighing and sampling.

Thank you for your attention to the above and should you have any questions, please call me at (212) 605 - 2150.

Very truly yours,
