Item 6 - Material Use

- A. For use in a Troxler model 3400 series, or 4640, or 4545 measuring gauge.
- B. For use in a Troxler model 3400 series portable measuring gauge.
- C. For use in a Troxler model 3241 portable asphalt content measuring gauge.

ite " - Radiation Safety Officer

Fred Dahlman has been designated as the company Radiation Safety Officer. A copy of his Troxler Nuclear Gauge Training Certificate is attached for your review. The duties of the Radiation Safety Officer are specified in Item 10.

Item 8 - Training of Gauge Users

Each individual that will operate the nuclear gauge will complete the Troxler Nuclear Gauge Training Course, read and understand our radiation safety procedures, and, be approved by our Radiation Safety Officer. Copies of each individual's training certificate will be maintained on file.

Item 9 - Gauge Storage Area

I have attached a sketch of the area where guages will be stored when not in use.

Item 10 - Radiation Safety Program

I have attached a copy of the Company's Radiation Safety Program.

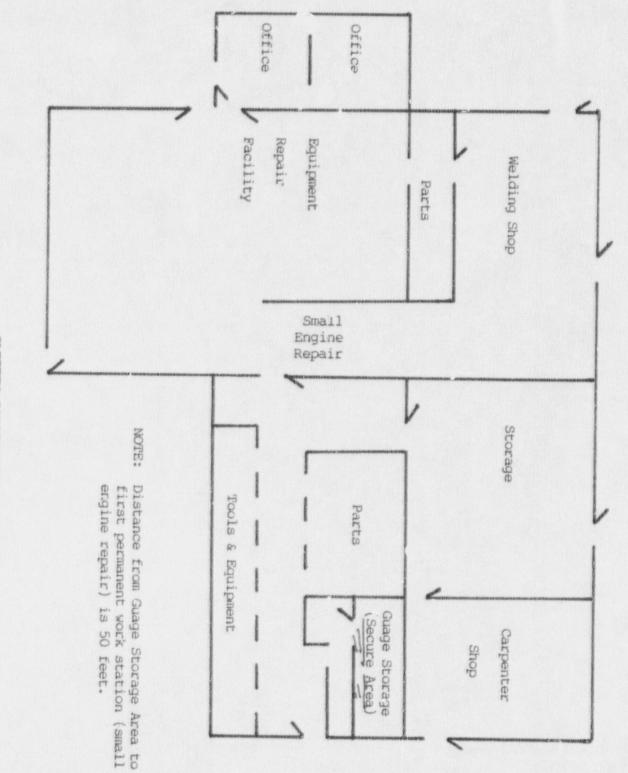

• • • • •

Item 11 - Waste Management

.

Disposal of the gauge will be by transfer to another facility specifically licensed for the material; or returned to the gauge manufacturer. Records of transfer will be maintained on file.

Radiation Safety Program

1. Radiation Safety Officer

- A. Fred Dahlman has been designated as the company Radiation Safety Officer and will assume the c ties and responsibilities that include the following:
 - To ensure that all terms and conditions of the license are being met and that the information contained in the license is up-to-date.
 - To ensure that the equipment has been leak tested in the required timely manner and that the leak test is performed in the manner prescribed by the equipment manufacturer.
 - 3. To ensure that the use of the equipment is only by individuals that have been authorized by the Radiation Safety Officer and that all users wear personnel monitoring equipment when utilizing the equipment.
 - To maintain the records as required by the license and the regulations. These records shall include personnel exposure records, leak test records and training certificates for all users.
 - To ensure that the equipment is properly secured against unauthorized removal at all times when it is not in use.
 - To serve as a point of contact and give assistance in case of emergency such as equipment damaged in the field or theft and to notify the proper authorities in case of emergency.
 - To ensure that all users have read and understand the radiation safety operating and emergency procedures.

2. Operating Procedures

- A. Transportation of Equipment
 - All possible means shall be provided to ensure that the equipment is fully secured in the transporting vehicle and the equipment is away from the passenger compartment. When transporting in an enclosed vehicle (car or van), the vehicle will be locked. When transporting in an open bed vehicle, the gauge should be securely fastened and locked to the truck bed.
 - The gauge will be transported in the TROXLER transportation case. The U.S. Department of Transportation requires that the gauge be transported in a properly labeled carrying case.

- At all times during transport, the operator will have a properly completed Bill of Lading for each gauge.
- B. Utilization Procedures

.

- When the gauge is in the field, you as the authorized user must maintain control over the gauge at all times. The gauge must never be left unattended.
- 2. When not making measurements, the gauge should be placed in the transportation case and returned to its permanent storage area as soon as possible. The gauge is to be used for its intended purpose only. By doing so, you will maintain any radiation exposure to as low as reasonable attainable.
- 3. When using the equipment, you will wear the personnel monitoring device that has been assigned to you. When you are not using the equipment, your monitoring device is to be stored in the radiation free area that has been designated in the office.
- C. Maintenance and Leak Test Procedures
 - Periodic maintenance will include cleaning the gauge. During any maintenance, you must wear you personnel monitoring device.
 - No maintenance will be performed in which the radioactive source is removed from the guage. For this type of maintenance, the gauge will be returned to the manufacturer.
 - 3. The leak test will be performed using the TROXLER Model 3880 Leak Test Kit. The leak test will be performed using the manufacturer's instructions. Again, the personnel monitoring device will be employed. Gauges will be leak tested at intervals not to exceed six (6) months.

3. Emergency Procedures

- A. In the event of physical damage to a gauge, the following will be performed:
 - Immediately cordon off an area around the gauge. An area radius of 15 feet will be sufficient.
 - If a vehicle is involved, it must be stopped until the extent of contamination, if any, can be established.
 - 3. A visual inspection of the gauge is to be made to determine if the source housing and/or shielding has been damaged.

- 4. At the earliest possible time, when the situation is under control, you must contact Fred Dahlman at 761-7920. Describe the present conditions and follow the instructions of the Radiation Safety Officer.
- B. In the event the gauge is lost or stolen, immediately notify the Radiation Safety Officer as listed above in Item 3.A.4.
