## 2.0 Summary of Inservice Inspections

The information shown below provides an abstract of ASME Section XI Class 1, Class 2, and Augmented Items scheduled and examined during Outage 8 at Catawba Nuclear Station, Unit 2.

### 2.1 Class 1 Inspection

Examination Category B-A

#### Pressure Retaining Welds in Reactor Vessel

| ltem<br>Number | Description           | Total Examined<br>During Outage |
|----------------|-----------------------|---------------------------------|
| B01.010        | Shell Welds           |                                 |
| B01.011        | Circumferential       | 0                               |
| B01.012        | Longitudinal          | 0                               |
| B01.020        | Head Welds            |                                 |
| B01.021        | Circumferential       | 1                               |
| B01.022        | Meridional            | 4                               |
| B01.030        | Shell to Flange Welds | 0                               |
| B01.040        | Head to Flange Welds  | 1                               |
| B01.050        | Repair Welds          | and the second second           |
| B01.051        | Beltline Region       | NA                              |
| TOTALS         |                       | 6                               |

## 3.0 Second Ten Year Interval Inspection Status

The completion status of inspections required by the 1989 ASME Section XI Code, no Addenda, is summarized in this section. The requirements are listed by the ASME Section XI Examination Category as defined in Table IWB-2500-1 for Class 1 Inspections and Table IWC-2500-1 for Class 2 Inspections. Augmented inspections are also included.

| Examination<br>Category | Description   | Inspections<br>Required | Inspections<br>Completed | Percentage<br>Completed | <sup>7</sup> Deferral<br>Allowed |
|-------------------------|---|-------------------------|--------------------------|-------------------------|----------------------------------|

#### Method Used to Discover Problem:

Problem was discovered during data review by the ANII.

#### Brief Problem Description:

This PIP documents a problem with UT Inspections.

UT inspections were performed using search units other than those required by the NDE Program. Procedure NDE-600, revision 9, requires that only search units shown on Table 1 are to be used for examination. Contrary to this requirement, other search units were used by UT inspectors for the examinations. No Operability Concern was identified during initial screening by the Centralized Screening Team.

#### Detailed Problem Description:

Procedure NDE-600, revision 9, requires that only search units shown on Table 1 are to be used for examination. Contrary to this requirement, other search units were used by UT inspectors for the examinations.

Other Units/Components/Systems/Areas Affected (Y.N.U):

Industry Plants Affected (Y.N.U): U

Immediate Corrective Actions:

The transducers that were used for the examinations at CNS were demonstrated to the CNS ANII. All transducers were shown to be capable of detecting flaws in welded mock-ups. Based on the results of this demonstration, the UT exams performed at CNS are acceptable.

| Problem             | Evaluation:                    |   |                                 |                       |                                |

Problem Evaluation:

The UT technicians overlooked the requirement to use only the search units listed in Table 1. The review of the inspection data package by another technician did not identify the error. Procedure NDE-600 did not emphasize the use of Table 1 for search unit selection.

VI. Proposed Resolution

Proposed Resolution From: Resp. Group: DSD Status: Closed OEDB Checked: No

Procedure NDE-600 should be revised to clarify the requirement that only search units shown in Table 1 be used for the examination.

The transducers used at CNS will be formally qualified at the EPRI NDE Center the week of September 8, 1997. A copy of this PIP, when completed, will be placed in the CNS ISI Report (hard copy).
