On March 6-7, 1989, M. Horn and D. McCaughey visited the CNFP to discuss NRC comments related to BWFC's renewal application. The visit opened with an entrance meeting led by D. McCaughey which was attended by all of BWFC's management personnel. After the meeting, NRC personnel toured the facility.

The remainder of the visit was spent discussing in detail NRC comments related to the renewal application. Most comments were resolved, with the licensee agreeing to submit revised pages to the application. With respect to radiation safety, a few comments remained unresolved; these are to be discussed via telephone between BWFC staff and NRC health physics personnel.

Before leaving the site, M. Horn and D. McCaughey toured the environmental monitoring stations and the wet-weather drainage system.

One item of note is that BWFC was provided with a draft copy of the Branch Technical Positions on Fire Safety, Chemical Safety, Management Controls, and Requirements for Operation.
