

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

MAY 19 1989

Docket Nos. 50-213
and 50-423

Mr. Edward J. Mroczka
Senior Vice President
Nuclear Engineering and Operations
Connecticut Yankee Atomic Power Company
Northeast Nuclear Energy Company
P. O. Box 270
Hartford, Connecticut 06141-0270

Dear Mr. Mroczka:

SUBJECT: SCHEDULAR RELIEF REQUEST RELATED TO NPC BULLETIN 88-11,
"PRESSURIZER SURGE LINE THERMAL STRATIFICATION" ITEM 1.b
FOR HADDAM NECK AND MILLSTONE UNIT 3 (TAC NOS. 72136
AND 72145)

The purpose of this letter is to inform you of the implementation schedule for Item 1.b of NRC Bulletin 88-11, "Pressurizer Surge Line Thermal Stratification" that was mutually agreed upon between the NRC staff and the Westinghouse Owners Group (WOG) during an April 11, 1989 meeting.

By letter dated February 28, 1989, you proposed an alternate schedule for the completion of the bounding analysis required by Item 1.b of NRC Bulletin 88-11 regarding the design adequacy of the pressurizer surge line, taking into account the effects of thermal stratification. Your proposed schedule for completion of Item 1.b (two years from the date of the Bulletin) was consistent with the alternate schedule proposed by the Westinghouse Owners Group program.

During an April 11, 1989 meeting between the staff and the WOG, the staff expressed that the alternate schedule as originally proposed by the WOG was unacceptable. Based upon additional discussion, the WOG agreed to notify its membership that licensees of plants in operation over 10 years should, by the end of May 1989, complete and have available for NRC audit, their bounding analysis as related to Item 1.b of the Bulletin, and submit to the NRC a Justification for Continued Operation (JCO) in the event the results of the bounding analysis do not confirm the adequacy of the pressurizer surge line for the design life of the plant. Licensees of plants in operation less than 10 years would be notified that they were required to complete the required actions of Item 1.b within the originally stated period (one year from receipt of the Bulletin). The staff found these proposals to be acceptable.

It is our understanding that the WOG will provide you with a "generic" bounding analysis, to which your plant specific variables (e.g., seismic and thermal loadings) will need to be added and incorporated. Your analysis should assess all aspects of thermal stratification and thermal stripping, including bounding evaluations on stresses and fatigue, based on currently available information.

DFDL 1/1

Mr. Edward J. Mroczka

- 2 -

Based upon your participation in the WOG program regarding this issue and absent any other justification, your proposed alternate schedule of completing Item 1.b is not approved. It is our expectation that your efforts will be accelerated to meet the completion date(s) as committed by the WOG.

Sincerely,

/s/

John F. Stolz, Project Director
Project Directorate I-4
Division of Reactor Projects I/II
Office of Nuclear Reactor Regulation
