Marymount Hospital
ATTN: Thomas J. Trudell, President
12300 McCracken Blvd.
Garfield Heights, OH 44125

Gentlemen:

Enclosed is Amendment No. 34 renewing your NRC License No. 34-05382-01 in accordance with your request.

Please note that Christine Eckhauser, M.D. has not been given authorization to use material in 10 CFR 35.300. In order to be listed as a user for Section 35.300, Dr. Eckhauser must submit Supplement B documenting clinical experience in the treatment of hyperthyroidism in 10 individuals and treatment of thyroid carcinoma in 3 individuals as a minimum. Refer to 10 CFR 35.932 and 35.934. Also, Byung H. Woo, M.D., has previously only been authorized for material in 10 CFR 35.100 and 35.200 and therefore will not be given authorization for material in 35.300.

License Condition 13. has been added requiring you to issue the Model Radiation Safety Officer Delegation of Authority in Appendix F of Regulatory Guide 10.8, Revision 2. Also, it was determined through a phone conversation with Laurie Coulter of Nuclear Medicine that Molybdenum 99 - Technetium 99m generators and Xenon-133 will not be used at your facility. This is reflected in your license document. If you wish this to be changed at a later date, you must apply for an amendment to your license.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.

8904050366 880401
REG3 LIC30
34-05382-01 PNU

5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Original Signed By
Kevin G. Null
