RECEIVED

July 14, 1989

William L. Fisher, Chief
Nuclear Materials Safety Branch
United States Nuclear Regulatory Commission,
Region IV
611 Ryan Plaza Drive, Suite 1000
Arlington, TX. 76011

Dear Mr. Fisher:

This refers to Docket: 030-30422, License 35-05860-C3 and is a reply to a notice of violation from your office as of 7/10/89. The problem was a survey meter without a check source.

1. The meter was purchased before the necessity of having a check source was required by USNRC. The rules changed about a year ago on that matter I believe.
2. We have purchased and attached the requisite test source and it is attached to the survey meter in question, Ludlum model 5, and the meter response is noted with the new calibration.
3. All meters on the premises now have check sources as required. If new meters are ordered they will be ordered with check sources.
4. The check sources were attached and meter response determined and noted with the new calibration on 7/12/89.

Sincerely,

David W. Anderson

Docket: 030-30422

Oklahoma Osteopathic Hospital
ATTN: James McCallum
Executive Officer
744 West 9th Street
Tulsa, Oklahoma 74127

Gentlemen:

This refers to the routine, announced radiation safety inspection conducted by Mr. Selvan Rajendran of this office on June 26, 1989, of activities authorized by NRC Byproduct Material License 35-05860-03 and to the discussion of our findings with Dr. David Anderson and Randy Arnold at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the NRC inspectors.

During this inspection, certain of your activities were found not to be conducted in full compliance with NRC requirements. Consequently, you are required to respond to this matter in writing, in accordance with the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Your response should be based on the specifics contained in the Notice of Violation enclosed with this letter.

The response directed by this letter and the accompanying Notice is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

Should you have any questions about this inspection, we will be pleased to discuss them with you.

Sincerely,

William L. Fisher

APPENDIX A

NOTICE OF VIOLATION

Oklahoma Osteopathic Hospital
Tulsa, Oklahoma 74127

Docket: 030-30422
License: 35-05860-03

During an NRC inspection conducted on June 26, 1989, violations of NRC requirements were identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1988), the violations are listed below:

10 CFR 35.51(a)(3) requires that licensees conspicuously note on the survey instrument the apparent exposure rate from a dedicated check source as determined at the time of calibration, and the date of calibration.

Contrary to the above, as of June 26, 1989, a Ludlum Model 5 survey meter did not possess a dedicated check source.

This is a Severity Level IV violation. (Supplement VI)

Pursuant to the provisions of 10 CFR 2.201, Oklahoma Osteopathic Hospital is hereby required to submit to this office, within 30 days of the date of the letter transmitting this Notice, a written statement or explanation in reply, including for each violation: (1) the reason for the violation if admitted, (2) the corrective steps which have been taken and the results achieved, (3) the corrective steps which will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Where good cause is shown, consideration will be given to extending the response time.

Dated at Arlington, Texas,
this 10th day of July 1989
