BROWNS FERRY NUCLEAR PLANT (BFN) - UNITS 1, 2, AND 3 -
TECHNICAL SPECIFICATIONS (TS) NO. 372, ADMINISTRATIVE
CONTROLS - REVISION 2

In accordance with the provisions of 10 CFR 50.4 and 50.90, TVA is submitting a revision to Section 6.3 of TS 372 which was submitted June 6, 1996. The proposed revision is being made in response to NRC staff comments. This change will replace the direct reference to the Nuclear Quality Assurance Plan (TVA-NQA-PLN89-A) in TS Section 6.3, Plant Staff Qualifications, with the actual requirements stated in TVA-NQA-PLN89-A. This change is also consistent with the corresponding section in NUREG-1433, Revision 1, "Standard Technical Specifications for General Electric Boiling Water Reactors (BWR/4)."

The changes do not alter the determinations provided with the original submittal of TS 372 that there are no significant hazards considerations associated with the proposed change and the determination that changes qualify for a categorical exclusion from environmental review pursuant to the provisions of 10 CFR 51.22(c)(9). Additionally, in
