Dear Mr. Creel:

SUBJECT: GENERIC LETTER 89-08, "EROSION/CORROSION INDUCED PIPE WALL THINNING" (TAC NOS. 73465 AND 73466)

On May 2, 1989, the NRC issued Generic Letter (GL) 89-08 which requested you to stipulate whether or not you have implemented, or intend to implement, a long term erosion/corrosion monitoring program to ensure the structural integrity of all single and two phase high-energy carbon steel systems at Calvert Cliffs Units 1 and 2.

Your response dated July 19, 1989, confirmed that you currently have such a program and that by December 31, 1989 a controlling procedure shall be in place establishing implementation and administrative requirements for this erosion/corrosion monitoring program. Consequently, your response to GL 89-08 is satisfactory and shall be considered complete contingent upon your implementation of the program controlling procedure.

To facilitate closure of this action, it is requested that you submit written notification to the NRC that the erosion/corrosion program controlling procedure is in place and that this program has been fully implemented.

Please provide the requested information within 60 days following the effective date of full erosion/corrosion program implementation at Calvert Cliffs.

This request for information at rects fewer than 10 respondents; therefore, OMB clearance is not required under Public Law 95-511.

Sincerely.

Sutt alexander Mr Mut
