

**BEFORE THE UNITED STATES
NUCLEAR REGULATORY COMMISSION**

In the Matter of
NEW YORK POWER AUTHORITY
James A. FitzPatrick Nuclear Power Plant

)
) Docket No. 50 -333
)

**APPLICATION FOR AMENDMENT
TO OPERATING LICENSE**

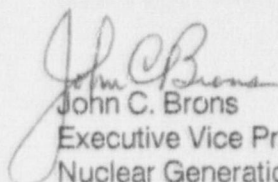

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission (NRC), the New York Power Authority, as holder of Facility Operating License No. DPR-59, hereby applies for an Amendment to the Technical Specifications contained in Appendix A of this license.

This application for an amendment to the FitzPatrick Operating License proposes changes to the Technical Specifications Table 3.7-1, "Process Pipeline Penetrating Primary Containmentment." The changes clarify and update the table to accurately reflect the as-built condition of the plant and promote consistency with the NRC's Standard Technical Specifications. The notes associated with the table are also revised by this amendment application.

The revised Table 3.7-1 has been retitled "Primary Containmentment Isolation Valves." Entries are now arranged by containment penetration. This arrangement better describes the valve(s) and penetration function and simplifies the table. Unnecessary columns have been deleted while improved notes clarify the table.

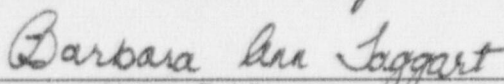

The proposed changes are Attachment I to this Application for Amendment to the Operating License. The Safety Evaluation for the proposed changes to the Technical Specifications is included as Attachment II.

New York Power Authority

John C. Brons
Executive Vice President
Nuclear Generation
