Docket No. 50-312
Rancho Seco Nuclear Generating Station
License No. DPR-54
1989 REVISION OF USAR - REQUEST FOR AN EXTENSION TO THE REQUIREMENTS OF
10 CFR 50.71

Attention: George Knighton

Pursuant to the outcome of the June 6, 1989 election regarding continued operation of Rancho Seco by the Sacramento Municipal Utility District (SMUD), the plant was shut down on June 7, 1989. Golden State Energy had been negotiating with the District to buy Rancho Seco until the Board of Directors rejected the GSE offer on September 11, 1989. The District is currently working towards permanently closing the plant.

The District requests permission to submit the next amendment to the Updated Safety Analysis Report with the decommissioning plan submittal. This extension will allow the District to incorporate the plant closure status in the USAR update thereby more accurately reflecting plant conditions. Subsequent amendments would be submitted at twelve month intervals from that date as required.

Enclosed is a check for \$150.00 pursuant to the requirements of 10 CFR 170.21 for the application fee for NRC review and approval.

Please contact me if you have any questions. Members of your staff with questions or requiring additional information or clarification may contact Mr. Paul Lavelly at (209) 333-2935, extension 4707.

Sincerely,

Dan R. Keuter
