ENCLOSURE

NOTICE OF VIOLATION

Huntington Testing, Inc.
Huntington, West Virginia

Docket No. 030-20243
License No. 47-23076-01

During the Nuclear Regulatory Commission (NRC) inspection conducted on September 13, 1989, violations of NRC requirements were identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1989), the violations are listed below:

- A. Condition 15 of License No. 47-23076-01 requires the licensee to conduct its program in accordance with the statements, representations, and procedures contained in the application dated November 25, 1985.

Step 3.3 of Procedure No. 2 contained in the application requires that film badges be exchanged on a monthly basis.

Contrary to the above, between December 4, 1988 and September 13, 1989 film badges were submitted late to the processor by one, two, three, and four months on 24, 16, 6, and 3 occasions respectively.

This is a Severity Level IV violation (Supplement VI).

- B. 10 CFR 34.11(d) requires that each radiographer be observed during actual radiographic operations at intervals not to exceed three months.

Contrary to the above, one radiographer was last observed on March 16, 1989 and performed radiography on July 10, 1989, and a second radiographer was last observed on March 10, 1989 and performed radiography on July 24, 1989.

This is a Severity Level IV violation (Supplement VI).

- C. 10 CFR 20.105(b)(2) requires that radiation levels in unrestricted areas be limited so that an individual who was continuously present in the area could not receive a dose in excess of 100 millirems in any seven consecutive days.

Contrary to the above, on September 13, 1989, a radiation level of 1.2 millirems per hour existed in an area adjacent to the storage area. Had an individual been continuously present in the area for seven consecutive days he could have received a dose in excess of 100 millirems.

This is a Severity Level IV violation (Supplement IV).

2

Docket No. 030-20243
License No. 47-23076-01

Pursuant to the provisions of 10 CFR 2.201, Huntington Testing, Inc. is hereby required to submit a written statement or explanation to the Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy to the Regional Administrator, Region II, within 30 days of the date of the letter transmitting this Notice. This reply should be clearly marked as a "Reply to a Notice of Violation" and should include [for each violation]: (1) admission or denial of the violation, (2) the reason for the violation if admitted, (3) the corrective steps which have been taken and the results achieved, (4) the corrective steps which will be taken to avoid further violations, and (5) the date when full compliance will be achieved. Where good cause is shown, consideration will be given to extending the response time. If an adequate reply is not received within the time specified in this Notice, an order may be issued to show cause why the license should not be modified, suspended, or revoked or why such other action as may be proper should not be taken.

FOR THE NUCLEAR REGULATORY COMMISSION

William E. Cline, Chief
Nuclear Materials Safety and
Safeguards Branch
Division of Radiation Safety
and Safeguards

Dated at Atlanta, Georgia
