

The Deputy Secretary of Energy

Washington, DC 20585

August 29, 1989

The Honorable Kenneth M. Carr
Chairman, Nuclear Regulatory Commission
One White Flint North
11555 Rockville Pike
Rockville, MD 20555

Dear Mr. Chairman:

The President has directed the Department of Energy to develop a National Energy Strategy (NES). To support this effort, the Chairman Pro Tempore of the Economic Policy Council, Secretary Brady, created a Council Working Group, by memorandum of July 26, 1989. This group will be comprised of Departmental representatives of Assistant Secretary rank or higher.

Secretary Watkins has appointed me to represent the Department of Energy on the Working Group and, as requested by Secretary Brady, to chair it. I look forward to proceeding with this important task.

Inherent in the strategy will be issues which have specific impact on Federal Agencies other than those Departments designated as members of the Working Group. The input of your Agency would be very helpful to a full discussion of these intergovernmental issues. I am therefore inviting you to designate a representative to participate in this interagency process.

Should you have any questions, please contact the Office of the Deputy Under Secretary for Policy, at 586-5325. We will schedule a first meeting of the working group as soon as practicable.

We look forward to your participation in the NES development process.

Sincerely,

W. Henson Moore
