Hi Casey -

That is correct. I will be RSO and Paul Frith is the alternate.

Thanks!

Hi Ben,

One last question to make sure I have this correct for your license. Was it your intent that you would be RSO and Mr Frith would act as the alternate? We don't put more than one RSO or Alternate/Assistant RSOs on the license so I want to be sure I have it right.

Thanks,

Casey

This is from NUREG 1556 Vol. 1, Rev. 2

The RSO may delegate certain day-to-day tasks of the radiation protection program to other responsible individuals, sometimes referred to as "alternate RSOs" or "site RSOs." For example, a licensee with multiple permanent locations of use or use at temporary jobsites may appoint "site RSOs," who assist the RSO and are responsible for the day-to-day activities at these locations. Licensees may also appoint "alternate RSOs" who may "step in" as an emergency contact when the RSO is unavailable. Such "alternate RSOs" or "site RSOs" do not need to meet all RSO qualifications; however, they should be qualified, experienced authorized users who have adequate knowledge of the activities to which they are assigned. These individuals should have the same management support and decision-making authority as the RSO that is necessary to accomplish the tasks to which they have been assigned. Please note that only the primary RSO is named on an NRC license."

Ben,

Have you had a chance to send this letter and maybe it was lost in my inbox? As soon as you provide me this info, I can complete the processing of your license application.

Thanks,

Casey

Hi Ben,

Thank you! This all looks great and I am working on processing your license. There is

one thing I want to confirm with you. In your letter response #2, you stated that you do not intend to store gauges at temporary job sites. The NRC license condition regarding temporary job sites gives authorization for storage and use at those job sites. Please confirm in a signed letter that you intend to use gauges at temporary job sites in NRC jurisdiction.

If you have any questions, please let me know.

Thanks,

Casey Alldredge

Hello Mr. Vance,

I am reviewing your application, dated June 15, 2020, for an NRC License for Liberty Geotech. I sent you an email a few weeks ago (attached) asking for some additional information and haven't heard back, so I thought I would follow up. Did you have any questions regarding the information I requested?

Thanks,

Casey Alldredge
