URANIUM OPERATIONS

May 24, 1978

Mr. Pat Donahoe
Environmental Impact Agency
P.O. Box 2348
Santa Fe, N.M. 87503

Dear Mr. Donahoe;

The reason for the delay in getting our quarterly mill environmental report to your E.I.A., is primarily due to Mr. Bill Fort and Mr. Dick Douglas from the Environmental Protection Agency in Las Vegas, Nevada. They have been here since May 15, 1978, doing extensive testing on our yellowcake mill dryer scrubber and dust collector. We would like to incorporate this data, along with the data from the radon-226 monitoring they are doing on the yellowcake stacks and in the counter-current decantation (CCD) and GNL stacks, in with our report.

This is pursuant to the telephone conversation we had on April 28, 1978.

Sincerely,

John D. Ritts
Chemist I/Mill Environmentalist
