

DOCKETED JUN 31, 1998
USMRC

Dear Chairwoman,

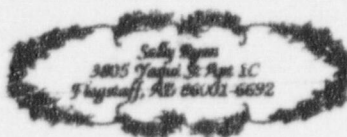

After reading on '98 JUN -4 P12:26
HRI (Hydro Resources, Inc.) proposal
to mine uranium by ISL method
at Crownpoint, New Mexico, I urge
you to somehow intervene
to deny HRI opportunity to do
such a harmful, ridiculous thing.

The consequences would be
diminishing health for the Navajos
and other residents while only
HRI benefits and one wonders
if they would benefit as demand
and market prices for uranium
is very low.

It would be advisable for you
to hold a hearing in Crownpoint
to allow residents to voice
their concerns.

Sincerely yours,

Sally Ryan
