Subject: **TENNESSEE VALLEY AUTHORITY - CENTRAL EMERGENCY CONTROL
CENTER EMERGENCY PLAN IMPLEMENTING PROCEDURE REVISION**

In accordance with the requirements of Title 10 of the *Code of Federal Regulations* (10 CFR) 50.54(q) and 10 CFR 72.44(f), Tennessee Valley Authority (TVA) is submitting a description of changes to the TVA Radiological Emergency Plan (REP). The affected document is a Central Emergency Control Center (CECC) Emergency Plan Implementing Procedure (EPIP).

<u>Document</u>	<u>Revision</u>	<u>Title</u>	<u>Effective Date</u>
CECC EPIP-8	51	Dose Assessment Staff Activities During Nuclear Plant Radiological Emergencies	8/21/2020

Description of Changes and Summary of Analysis

CECC EPIP-8

TVA revised this EPIP to specify what documentation is provided by the Radiological Assessment Manager / Coordinator and how it is transmitted.

In addition, editorial changes were made to have notes correlated to superscript numbers, to clarify which release points are filtered and which are unfiltered, to remove mention of the Excel spreadsheet formerly associated with one of the attachments, and to update the location of the Tennessee River Mile location listing.

The above changes were evaluated in accordance with 10 CFR 50.54(q)(3) and 10 CFR 72.44(f). TVA determined that the changes did not reduce the effectiveness of the TVA REP. The TVA REP, as revised, continues to meet the requirements in Appendix E to 10 CFR 50 and the planning standards of 10 CFR 50.47(b).

There are no new regulatory commitments associated with this submittal. If you have any questions regarding this information, please contact Gordon Williams, Senior Manager, Fleet Licensing (Acting) at (423) 751-2687.

Respectfully,

Jonathan T. Johnson
Director, Nuclear Regulatory Affairs (Acting)
