**Subject:** Summary of conference call with Centrus Energy Corp./American Centrifuge Operating  
**Date:** Wednesday, September 09, 2020 5:05:00 PM

---

Damaris,

On August 27, 2020, NRC staff held a closed conference call with American Centrifuge Operating (ACO) and Paschal Solutions staff to discuss NRC's draft requests for additional information (RAI's) regarding the American Centrifuge Plant High Assay Low Enriched Uranium Demonstration Program's Fundamental Nuclear Material Control Plan (FNMCP), which the NRC had provided ACO via e-mail on August 10, 2020 (ADAMS Accession No. ML20230A028). The participants of the call were as follows:

ACO

Kelly Wiehle  
Robin Halverson

Paschal Solutions, Contractors to ACO

Sheena Whaley  
Pearline Teeters  
Gerald Couture  
Steve Harris

NRC

Yawar Faraz  
Suzanne Ani  
Tom Pham

During the call, Paschal Solutions requested NRC staff to clarify seven of its RAIs regarding the FNMCP, which they did. At the end of the call, the NRC staff also provided ACO and Paschal Solutions staff, several editorial comments which the NRC staff had identified during their review of the FNMCP. ACO staff noted these and said they will be incorporated in the next revision of the FNMCP. The NRC staff indicated that it did not need to modify its draft FNMCP RAIs as a result of this call. ACO staff were satisfied with the NRC staff's statements and clarifications provided during the call.
