

NOTES

- EXISTING GROUND CONTOURS ARE BASED ON TOPOGRAPHIC MAPS SHEETS WHICH WERE DEVELOPED FROM AERIAL PHOTOS TAKEN IN JANUARY 1973 AND WERE FURTHER REVISED TO REFLECT ACTUAL GROUND CONDITIONS AS PER SANDERS AND THOMAS INC. DWG. PSA-C-800, REV. D, 12-8-80.
- BORINGS SHOWN ON THIS DRAWING WERE MADE IN 1973 AND 1974. FOR BORING LOG DATA AND FURTHER INFORMATION ABOUT THE UNDERLYING CONDITIONS, REFER TO APPENDIX J OF THE LIMERICK PSAR.
- MAJORITY OF SPRAY POND AREA IS COVERED WITH APPROX. 3 FEET OF ROCK FILL WHICH HAS BEEN USED FOR LAYDOWN OF CONSTRUCTION MATERIALS.

LEGEND

--- EXISTING GROUND CONTOUR
 --- TOP OF ROCK CONTOUR
 (LOCATION)

- BORING NUMBER
 ELEVATION EXISTING GROUND
 ELEV. TOP OF ROCK
- ALGER DRILL HOLES
 (PT. 1) DENOTES PERMEABILITY TEST MADE AT SAME LOCATION AS ALGER DRILL HOLE
- CORE HOLES
 (BOX AROUND) SYMBOL DENOTES GROUND WATER OBSERVATION WELL INSTALLED
- SOIL BORINGS (STANDARD PENETRATION TEST)
- GROUND WATER OBSERVATION WELL
