**2. EQUIPMENT LOCATION NUMBERING SYSTEM**

2.1 A unique equipment location number, consisting of a maximum of thirteen characters, will be assigned to each item of equipment or device to which field pulled wires are to be connected. These equipment location numbers will be used on schematic diagrams, connection diagrams and tray and conduit drawings to identify each item of equipment or device.

2.2.1 The first character will designate the unit numbers ("0" for common equipment), followed by one or more characters in accordance with the following list:

- A - 4.16 and 6.9 KV Switchgear
- B - 480 V Load Center and MCC
- C - Control Boards
- D - DC Power System
- E - Heat Exchangers
- F - Filters, Strainers, Screens
- G - Generators (incl. Drivers)
- H - Mechanical Handling Equipment
- J - Terminal Boxes and Junction Boxes
