U.S. Nuclear Regulatory Commission Public Meeting Summary

Title: General Electric Hitachi (GEH) public teleconference to discuss technical issues related to Containment Performance and Reactivity Control.

Meeting Notice: ADAMS accession number: ML20114E138

Date of Meeting: Thursday, April 30, 2020

Location: Via teleconference

Type of Meeting: Category 1

Purpose of the Meeting:

To discuss the technical merits of Licensing Topical Report (LTR) NEDC-33910P, "BWRX-300 Reactor Pressure Vessel Isolation and Overpressure Protection" (ADAMS Accession number ML19364A212) and pre-application matters related to construction permitting of the GEH BWRX-300 power reactor design.

Summary of Meeting:

The meeting started with a brief introduction by NRC licensing project manager (PM) Rani Franovich, who explained the purpose of the meeting (specifically to discuss provisions in the LTR that ensure isolation valves are qualified for their terminal end loads), asked participants to introduce themselves and described how the meeting would be conducted (including discussion of proprietary information on a separate, closed bridge-line).

Because the discussions involved proprietary information, the public portion of the meeting adjourned and detailed discussions of the LTR were resumed on the closed bridge-line.

After these closed discussions, the meeting was adjourned.

Meeting participants: See the following page.
