U.S. Nuclear Regulatory Commission

Consolidated Interim Storage Facility for Spent Nuclear Fuel in Andrews County, Texas

Public Comment Meeting October 1, 2020 Webinar

Webinar access:

https://usnrc.webex.com Event number: 199 125 5213 Event password: ISPDEIS **Telephone access** Phone number: 888-989-9268 Passcode: 5300047

AUDIO FOR THE MEETING IS THROUGH THE TELEPHONE LINE

U.S. Nuclear Regulatory Commission Draft Environmental Impact Statement for a Consolidated Interim Storage Facility (CISF) for Spent Nuclear Fuel in Andrews County, Texas

Public Comment Meetings Webinars – October 1, 6, 8, and 15, 2020

<u>Thursday, October 1, 2020 – 4pm MT / 5pm CT / 6pm ET</u> Webinar Event address: https://usnrc.webex.com/

Event number: 199 125 5213 Event password: ISPDEIS

Telephone access

Phone number: 888-989-9268 Passcode: 5300047

<u>Thursday, October 8, 2020 – 4pm MT / 5pm CT / 6pm ET</u> Webinar

Event address: <u>https://usnrc.webex.com/</u> Event number: 199 619 8948 Event password: ISPDEIS **Telephone access**

Phone number: 888-989-9268

Passcode: 5300047

Tuesday, October 6, 2020 – 12pm MT / 1pm CT / 2pm ET Webinar Event address: https://usnrc.webex.com/ Event number: 199 740 4202 Event password: ISPDEIS Telephone access Phone number: 888-989-9268 Passcode: 5300047

Thursday, October 15, 2020 – 9am MT / 10am CT / 11am ET Webinar Event address: https://usnrc.webex.com/ Event number: 199 551 6533 Event password: ISPDEIS Telephone access Phone number: 888-989-9268 Passcode: 5300047

AUDIO FOR ALL MEETINGS WILL BE THROUGH THE TELEPHONE LINE

Members of the Media

Please contact David McIntyre NRC's Public Affairs Officer David.McIntyre@nrc.gov

Spanish Language Staff and Slides

Spanish language slides are available at <u>https://www.nrc.gov/waste/spent-fuel-storage/cis/waste-control-specialist.html</u>

Native Spanish speaking staff available during today's meeting

Welcoming Remarks

6

NRC's Review Process

- Safety Review
- Environmental Review
- Overview of Interim Storage Partners' License Application
- Public Scoping Comments and Concerns
- NRC's Environmental Review Results
- Information Resources and Ways to Comment
- Public Comment

Meeting Overview

PURPOSE OF THE MEETING

To receive comments on the Draft Environmental Impact Statement (EIS) for ISP's Consolidated Interim Storage Facility (CISF) License Application

The NRC's Review Process for CISF License Applications

The NRC's CISF Review Process

- Evaluate the application and determine whether a license should be issued
- Not to promote ISP's proposal or the Consolidated Interim Storage Facility (CISF) concept
- Safety and Environmental Review of ISP's application
 - <u>Safety Review</u>: Determine whether ISP can safely construct and operate the CISF at the proposed site
 - <u>Environmental Review</u>: Evaluate the environmental impacts of building and operating the CISF at the proposed site

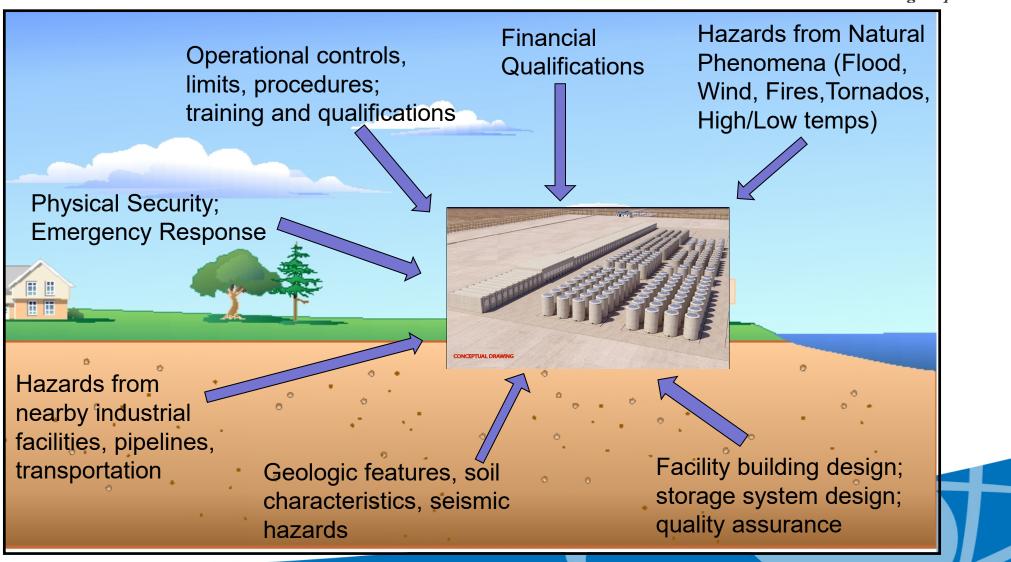

NRC's Decision Process for CISF Reviews

NRC's CISF Safety Review

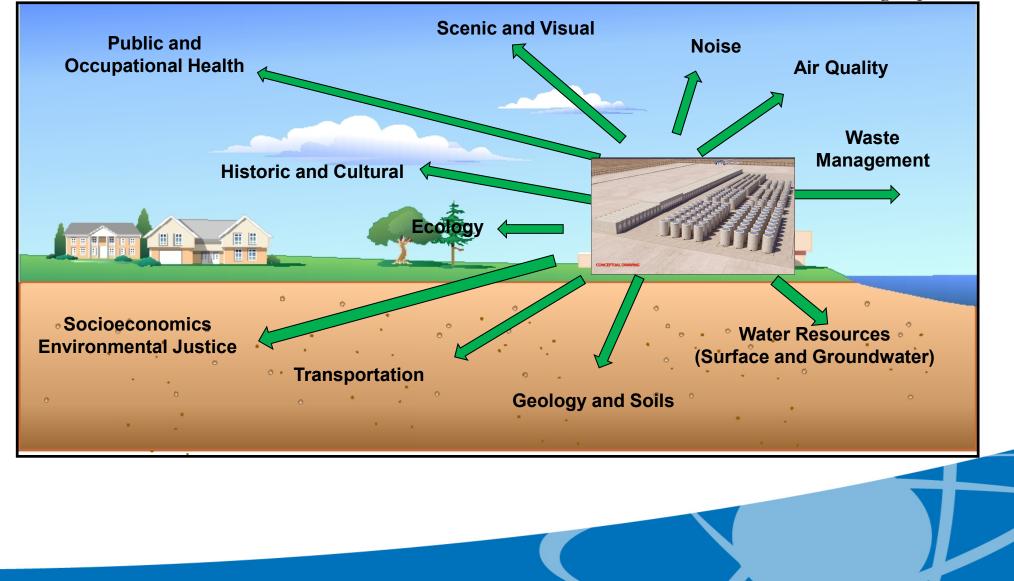

NRC's CISF Environmental Review

Protecting People and the Environment

Summary of ISP's License Application for its Proposed CISF for Spent Nuclear Fuel

ISP's Proposed CISF

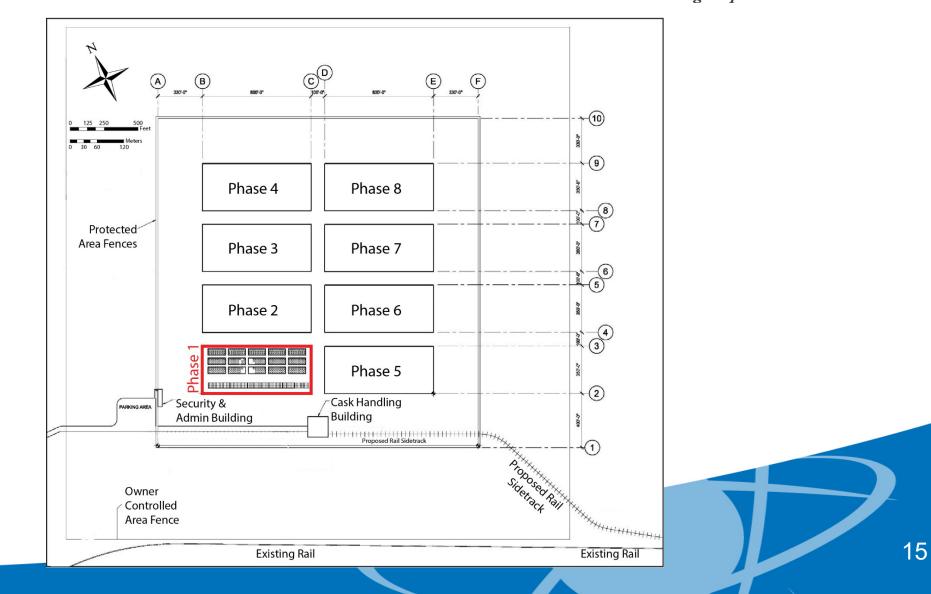

Source: Modified from National Enrichment Facility Environmental Report, December 2003)

14

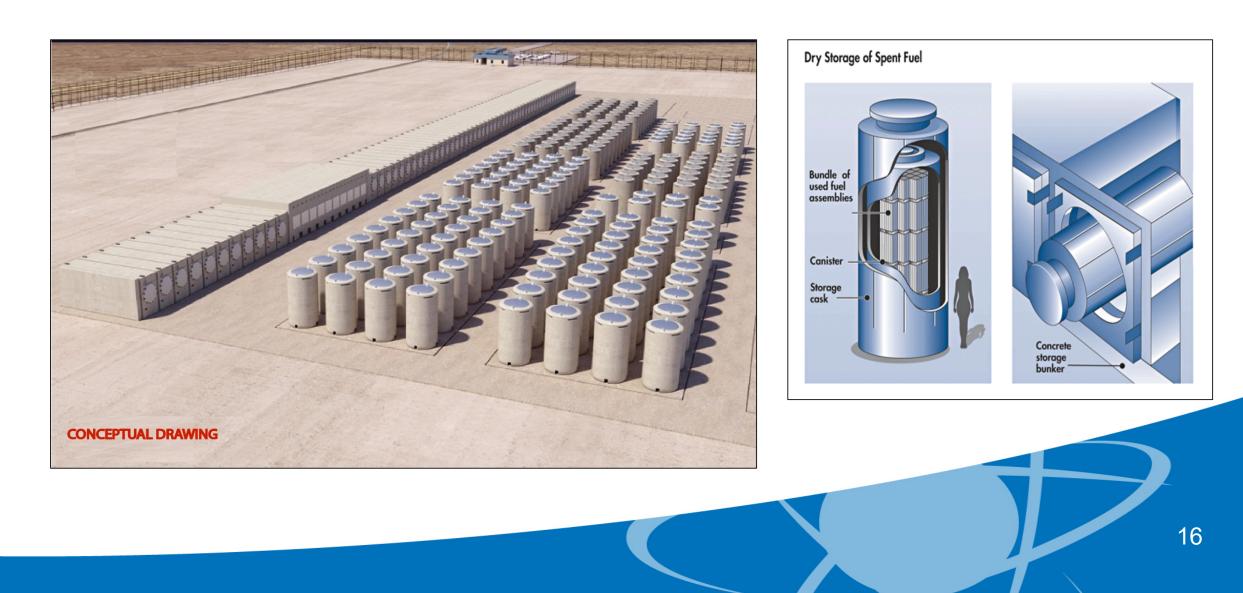

ISP's Proposed CISF

ISP's Proposed CISF

Phases and Stages

- ISP's proposed action is Phase 1 or 5000 MTUs
- EIS evaluates potentially impacts of up to 8 PHASES
 - Note that the safety review evaluates Phase 1 storage facility and any other facilities that are important to safety (i.e. transfer building components)
- EIS evaluates 3 STAGES of the project
 - Construction, Operation, and Decommissioning
- Phase 1 includes construction of rail sidetrack and additional supporting facilities

Public Scoping Comments

Scoping Process

- Scoping Periods
 - November 16, 2016 April 28, 2017 and September 4, 2018 November 19, 2018
 - Webinars from Rockville, MD and in-person meetings held in Andrews, TX and Hobbs, NM
- Comments
 - 29,430 pieces of comment correspondence
 - Approximately 3,200 unique scoping comments
- Scoping comment report
 - https://www.nrc.gov/docs/ML1916/ML19161A150.pdf

Scoping Comments

20

- Transportation
 - Safety/Accidents
 - Radiation dose to citizens near the rail line
- Geology
 - Induced seismicity
- Water Resources
 - Located near surface beneath WCS site
 - Contamination of Ogallala Aquifer
- Location and Land Use
 - Co-located with other waste storage activities at WCS site

- Socioeconomics
 - Greater impact on New Mexico due to site's border location
- Environmental Justice
 - Disproportionate on Hispanic population
- Out of Scope Safety Issues
 - Cask and canister design
 - Monitoring
 - Handling

Results of NRC's Environmental Review

- **SMALL** Environmental effects are not detectable or are so minor that they will neither destabilize nor noticeably alter any important attribute of the resource.
- **MODERATE** Environmental effects are sufficient to alter noticeably, but not to destabilize, important attributes of the resource.
- LARGE Environmental effects are clearly noticeable and are sufficient to destabilize important attributes of the resource.

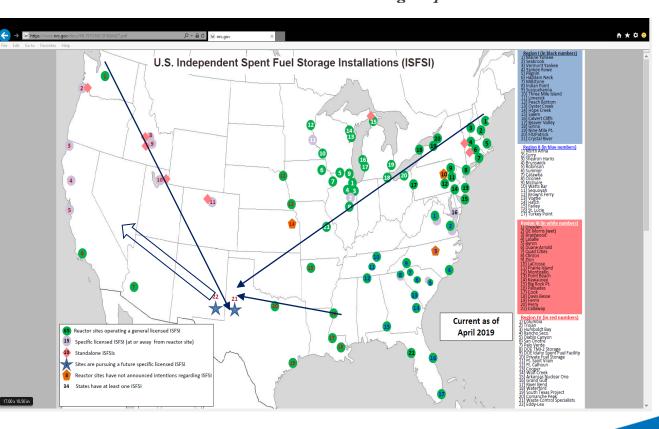

Transportation analysis

- Increase in traffic levels from workers and construction vehicles
- Evaluated spent fuel movement for Phase 1 (425 shipments) and for full buildout (3,400 shipments) using modeling
- Radiological dose rates to the public and workers along the rail route, from incident-free and accident conditions

Transportation impacts

- Minor increase in traffic along local roads around proposed site
- Dose of 1.9 mrem from 3,400 shipments to a person 30 meters from rail line.
- No accidental release of canistered fuel under the most severe impacts studied.

Ground Water analysis

- Shallowest confined ground water lies about 225 feet below the CISF site
- Isolated pockets of limited saturation found about 90-100 feet below the CISF site
- CISF site is about 1 mile, at closest approach, to SW of SW limits of Ogallala Aquifer

Ground Water impacts

- Potable water supplied from City of Eunice, NM's water wells
- CISF construction would not affect ground water due to depth to ground water
- CISF operation would not affect ground water due to facility design and depth to ground water

24

Geology analysis

- Evaporites about 1500 feet below the CISF site
- No sinkholes near the CISF site
- Largest recorded earthquake near CISF site is 1992 magnitude 5.0 earthquake about 18 mi away

Geology impacts

- Surficial excavation of soils during construction
- CISF site in area of low seismic risk
- Subsidence and sinkholes not likely due to depth to evaporite deposits below the CISF site

Socioeconomics analysis

- Primarily associated with workers who might move
- Resources available to the community
- Economic growth and tax revenues generated
- Demand on public services, schools and housing

Socioeconomics impacts

- Estimated maximum of 110 workers on site (50 construction workers, 60 regular workers)
- Impacts to a 3-county area (Andrews, Gaines, and Lea counties)
- Noticeable increase in population growth and in local revenues

Environmental Justice

- Analysis of the human health and environmental impacts on low-income and minority populations
- 109 block groups that fall completely or partially within the 50-mile radius of the proposed CISF project area.
- Identify disproportionately high and adverse impacts on minority or low-income populations
- NRC analysis does not find means or pathways for disproportionate effects on minority or lowincome populations
- No disproportionate impacts on minority or lowincome populations

Facility Location/Land Use analysis

- Location proposed by ISP
- Within larger WCS-owned property
- Active oil & gas extraction in the region surrounding the WCS property
- Nearest permanent resident is about 4 miles west of the proposed CISF site

Facility Location/Land Use impacts

- Access restrictions to WCS property and CISF site
- Approximately 330 acres disturbed by CISF construction
- Activities outside the CISF site would not be affected (e.g., grazing, oil & gas extraction)
- After CISF decommissioning, CISF infrastructure may remain or be removed

Results of NRC's Environmental Review

| RESOURCE | IMPACT EVALUATION (construction, operation and decommission/reclamation stages) |
|-------------------|--|
| Land Use | SMALL – Proposed Action SMALL – Additional Phases |
| Transportation | SMALL – Proposed Action SMALL – Additional Phases |
| Geology and Soils | SMALL – Proposed Action SMALL – Additional Phases |
| Surface Water | SMALL – Proposed Action SMALL – Additional Phases |
| Groundwater | SMALL – Proposed Action SMALL – Additional Phases |
| Ecology | SMALL to MODERATE – Proposed Action** SMALL to MODERATE – Additional Phases** ** until vegetation has been reestablished |
| Air Quality | SMALL – Proposed Action SMALL – Additional Phases |

Results of NRC's Environmental Review

| RESOURCE | IMPACT EVALUATION (construction, operation and decommission/reclamation stages) |
|-----------------------------------|--|
| Noise | SMALL – Proposed Action SMALL – Additional Phases |
| Historic and Cultural | SMALL – Proposed Action SMALL – Additional Phases |
| Visual and Scenic | SMALL – Proposed Action SMALL – Additional Phases |
| Socioeconomic | SMALL to MODERATE* *on population growth and beneficial on local finances |
| Environmental Justice | There would be no disproportionately high and adverse impacts to either minority or low-income populations |
| Public and Occupational Health | SMALL – Proposed Action SMALL – Additional Phases |
| Waste Management | SMALL – Proposed Action SMALL – Additional Phases |

How to Comment

- Oral Comments tonight
- Federal Rulemaking Web Site: Go to https://www.regulations.gov/ and search for Docket ID NRC-2016-0231. Address questions about NRC docket IDs to Jennifer Borges; telephone: 301-287-9127; e-mail: Jennifer.Borges@nrc.gov.
- Mail comments to: Office of Administration, Mail Stop: TWFN-7-A60M, ATTN: Program Management, Announcements and Editing Staff, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.
- E-mail comments to: <u>WCS_CISF_EIS@nrc.gov</u>

SUBMIT COMMENTS BY NOVEMBER 3, 2020

<u>NOTE</u>: The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at <u>https://www.regulations.gov</u> and enters all comment submissions into ADAMS, the NRC's document filing system.
