Subject: [External_Sender] No nuclear waste in our landfills (Document ID NRC-2020-0065-0001)

Dear Nuclear Regulatory Commission,

I oppose the Nuclear Regulatory Commission's plan to change regulations on how nuclear waste is disposed of. Nuclear waste is dangerous no matter how the NRC classifies it. With improper disposal, radioactive waste can leak into local water and food supplies. If incinerated, it can be released into the air.

This dangerous new proposal means that radioactive waste could end up in a landfill near me!

This proposed plan puts communities at risk since communities could be exposed to radioactive nuclear waste without even knowing it. Keep nuclear waste under regulatory control and out of public landfills.

Do we have an intelligent, honest government? We don't. With every action our government takes it is showing us that we have a corrupted, ignorant government mostly by the greed of power of their enablers. We demand that the protection of our water because water is basic for our survival must start to be mainly protection of its purity. We need clean water uncontaminated by pollutants and also free of any nuclear waste. Start working for the American people that supports all of you. Your immediate action is to stop any nuclear going into our water ways and garbage. We have regulated that waste, why are you failing to enforce the rules? Read and apply the Regulations gov Document ID NRC - 2020-0065-0001. Do it!

I urge you to protect people and end any plans that allow for nuclear waste in landfills. (Regulations.gov Document ID NRC-2020-0065-0001).

Sincerely,

Graciela Huth
