LISLE, IL 60532-4352

October 5, 2020

Stephen M. Williams, R.Ph.
Radiation Safety Officer
RLS (USA) Inc.
4380 Brockton SE
Ste. 3
Kentwood, MI 49512

SUBJECT: AMENDMENT NO. 41 TO RLS (USA) INC., NRC LICENSE NO. 21-26707-01MD

Dear Mr. Williams:

Enclosed is Amendment No. 41 to your U.S. Nuclear Regulatory Commission (NRC) Region III Materials License No. 21-26707-01MD, in accordance RLS (USA) Inc.'s (your) September 1, 2020 request. Your letter is available electronically from NRC's Agencywide Documents Access and Management System (ADAMS) at accession number ML20248H438. The NRC's ADAMS is accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html.

Please review the enclosed document carefully, and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III Office at 630-829-9887, so that we may provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (10 CFR) Section 51.22(c).

Please note that – as part of this review – we have considered your August 14, 2020 request to list Timothy B. Burke, R.Ph., as the Radiation Safety Officer (RSO) on the listed license. That letter is available electronically from NRC's ADAMS at accession number ML20227A259. Because that request excluded documentation of Mr. Burke's training and experience with the RadioGenix system currently authorized under the license, we could not add Mr. Burke as the RSO, at this time. To add Mr. Burke as the RSO, please provide additional documentation of his training and experience with the RadioGenix system.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The enclosure to this letter contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through NRC's ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC's Generic Communications Web page under "Regulatory Issue Summaries" at http://www.nrc.gov/reading-rm/doc-collections/gen-comm/ and the link for frequently asked questions regarding protection of security-related sensitive information may be located at http://www.nrc.gov/reading-rm/sensitive-info/faq.html.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS.

Sincerely,

Sara A. Forster
