Subject: [External_Sender] No nuclear waste in our landfills (Document ID NRC-2020-0065-0001)

Dear Nuclear Regulatory Commission,

This is why nuclear power should be banned. You can't be trusted to manage it safely. Nuclear waste in landfills? No!!!! If I poison a well, I'm executed for murder. When is this society going to see each individual responsible for this decision in the same light. That's what they, and all of those encouraging them to propose this decision, are doing; attempted murder of who knows how many people; not to mention the wildlife and other living things. Stop holding the earth at naught! You think that toxic sludge is going to stay contained? It will wind up in the ground water eventually, and if I could be queen for a day I'd plant each and every person responsible for this decision right in the middle of that radioactive mess. This stuff goes in the landfills, they ought to go in there too; the world would be better off for it!

I oppose the Nuclear Regulatory Commission's plan to change regulations on how nuclear waste is disposed of. Nuclear waste is dangerous no matter how the NRC classifies it. With improper disposal, radioactive waste can leak into local water and food supplies. If incinerated, it can be released into the air.

This dangerous new proposal means that radioactive waste could end up in a landfill near me!

This proposed plan puts communities at risk since communities could be exposed to radioactive nuclear waste without even knowing it. Keep nuclear waste under regulatory control and out of public landfills.

I urge you to protect people and end any plans that allow for nuclear waste in landfills. (Regulations.gov Document ID NRC-2020-0065-0001).

Sincerely,

Elizabeth Emmel
