Subject: [External_Sender] No nuclear waste in our landfills (Document ID NRC-2020-0065-0001)

Dear Nuclear Regulatory Commission,

I oppose the Nuclear Regulatory Commission's plan to change regulations on how nuclear waste is disposed of. Nuclear waste is dangerous no matter how the NRC classifies it. With improper disposal, radioactive waste can leak into local water and food supplies. If incinerated, it can be released into the air.

This dangerous new proposal means that radioactive waste could end up in a landfill or incinerator near me! Nuclear waste is radioactive, and therefore, toxic to humans and other living things, for thousands of years. Who will watch the landfills to make sure they aren't leaking now or in the future? What will prevent the nuclear waste from being used to cap the landfill and being subject to weathering and migration into the air, soils and water?

This proposed plan puts communities at risk since communities could be exposed to radioactive nuclear waste without even knowing it. This could happen to your children and their children. Don't you think it is important to protect them? Stop wasting our money on these ridiculous and dangerous proposals and do your job! Keep nuclear waste under regulatory control and out of public landfills.

I urge you to protect people and end any plans that allow for nuclear waste in landfills. (Regulations.gov Document ID NRC-2020-0065-0001).

Sincerely,

Theodora Tsongas
