Dear Nuclear Regulatory Commission,

Nuclear Regulatory Commission should halt its plan to change regulations nuclear waste classification & disposal. The proposal to reclassify radioactive waste does not make it safer, it only gives license for irresponsible handling of highly toxic waste. With improper handling & disposal, radioactive waste can leak into local water and food supplies. If incinerated, it can be released into the air.

This proposed plan puts communities at risk since communities could be exposed to radioactive nuclear waste brought to local landfills without even knowing it. Keep nuclear waste under regulatory control and out of public landfills.

I urge you to protect people and end any plans that allow for nuclear waste in landfills. (Regulations.gov Document ID NRC-2020-0065-0001).

Sincerely,

Jess Zelniker
