

UNITED STATES NUCLEAR REGULATORY COMMISSION

REGION IV 1600 E. LAMAR BLVD ARLINGTON TX 76011-4511

October 15, 2020

Austin R. Hadley, D.M.P. Radiation Safety Officer Alaska Cancer Treatment Center 188 West Northern Lights Boulevard Anchorage, AK 99503

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 50-35123-01

By electronic communication dated October 7, 2020, you informed the U.S. Nuclear Regulatory Commission (NRC) that Alaska Cancer Treatment Center wished to terminate NRC radioactive materials license number 50-35123-01. The NRC Form 314 dated October 7, 2020, and letter dated October 13, 2020, providing supplemental information stated that all licensed material had been disposed by a combination of decay-in-storage disposal method and by transfer to a licensed entity.

The supporting documentation to the NRC Form 314 provided copies of the most recent wipe test results, ambient radiation surveys and disposal records. The wipe test results document that there was no evidence of leakage of radioactive material from the sealed sources and that there was no presence of contamination in the areas of storage and/or use of licensed material. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been removed from your facility located at 188 West Northern Lights Boulevard, Anchorage, Alaska. This facility is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation with respect to NRC regulated material is required.

Please find enclosed Amendment No. 5 to License No. 50-35123-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(i) and (ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html.

Sincerely,

Roberto J. Torres, M.S., Senior Health Physicist Materials Licensing and Decommissioning Branch
