SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 49-29384-01

By letter dated September 23, 2020, you informed the U.S. Nuclear Regulatory Commission (NRC) that Uranium One Americas, Inc., wished to terminate NRC radioactive materials license number 49-29384-01. The NRC Form 314 dated September 23, 2020, stated that all radioactive material had been transferred to a licensed entity.

The staff has reviewed the statements made in your letter dated September 23, 2020, NRC Form 314, and NRC inspection reports. Based on the statements made and a review of your historical file and decommissioning records, the staff concluded that a leak test result is not required in accordance with sealed source and device registration certificate CO-1012-D-101-S. Furthermore, the staff concluded that all licensable radioactive material has been removed from your facility located at Christensen Ranch Satellite Facility in Kaycee, 932 Black & Yellow Road, Gillette, Wyoming. This facility is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 4 to license number 49-29384-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Roberto J. Torres, M.S., Senior Health Physicist
