General Comment

Serial liar Donald Trump was at it again at his recent super spreader rally in Florida. Among Trump's lies:

- that Biden won't cover pre-existing conditions, when it's Trump and the GOP that have attacked this coverage
- that Biden "abandoned" Scranton. Gee I guess 10-year-old Biden was supposed to stay behind when his parents moved?
- that the Covid-19 pandemic is being "crushed" when it's actually getting worse
- that he added 600,000 manufacturing jobs, when actually he lost 164,000 jobs
- that Mexico is paying for the Wall. And Luke Skywalker will lead the Space Force
- that TV cameras stopped recording him... though frankly this would be a blessing
- that he passed VA Choice, when actually Obama passed it
- that his long red tie isn't compensating for something
