

Web-Based Licensing System FY2021 Modernization and Enhancement Effort

Scope of Work

- **Digital Signature** - Within WBL, where a document is generated that requires an authorized signature (e.g., radioactive material license, export radioactive materials license, inspection report, etc.), provide the ability to digitally sign it.

WBL-ADAMS Integration

- **ADAMS Document Submission via WBL** - Within WBL, where a document for retention as an official agency record is generated, provide the ability to submit it to ADAMS, returning from ADAMS the ML number for use in WBL.

- **ADAMS Document Retrieval via WBL** - On any WBL screen, support hyperlinks to ADAMS documents by ML number. Allow retrieval of any ADAMS document that would be available to the WBL user through the direct ADAMS interface – specifically passing NRC-issued WBL user credentials so that non-public ADAMS documents are accessible to NRC WBL users.

A video about the WBL-ADAMS integration is found here:

- **Form 313 Processing** - Provide the ability for new applicants and existing licensees to submit their Form 313 applications on-line through the WBL interface, including the capability to store in-progress applications prior to their submittal.

WBL External Application Submittals

- **External Document Submission to ADAMS via WBL** - Upon receipt of documentation (both part of the initial submittal and responses to requests for additional information) provide the ability to submit it to ADAMS, this includes migrating documents from WBL to ADAMS.

- **Application Status Check** - Provide the ability for applicants to check on the status of the application through the same portal/means where they submitted their application.

WBL Project Management Data Analytics

- **Create / Track Work Plan** - Provide the ability to create and track a work plan for activities not related to certification, licensing, and inspection. The design will initially be based on the STIMS non-casework module within WBL.

- **Non-Casework Data Retrieval** - Provide data retrieval capability for non-casework actions that supports agency, business line, and office performance reporting.

- **WBL Module Data Retrieval** - Provide data retrieval capability across all WBL modules that supports agency, business line, and office performance reporting.
