NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Mr. John Raymond Johnson, Governor
Absentee-Shawnee Tribe
2025 S Gordon Cooper Dr.
Shawnee, OK 74801

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Governor Johnson:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Absentee-Shawnee Tribe under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

Written comments should be submitted by mail to:

ATTN: Program Management, Announcements and Editing Staff
Office of Administration
Mail Stop: TWFN-7A60M
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Electronic comments may be submitted to the NRC by accessing www.regulations.gov and searching for Docket ID NRC-2020-0201. Because there are limited personnel in NRC buildings at this time due to the COVID-19 public health emergency, the preferred method for providing your comments is through [regulations.gov](http://www.regulations.gov) or through the NRC staff email contact listed below.

The NRC will hold a public environmental scoping webinar on November 4, 2020 at 1:00 p.m. to 4:00 p.m. Eastern Time. The webinar will be held online and will offer a telephone line for members of the public to submit comments. Webinar details are available in the following NRC public meeting notice: <https://www.nrc.gov/pmns/mtg?do=details&Code=20201188>.

The application is available through the web-based version of the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible at <https://www.nrc.gov/reading-rm/adams.html>. The environmental report portion of the application is listed under ADAMS Accession No. [ML20246G698](https://www.nrc.gov/reading-rm/adams.html). The NRC expects to publish a draft Supplemental Environmental Impact Statement in August 2021. The NRC will forward the draft supplement to you for your review and comment. This draft supplement will include identification of historic properties, assessment of impacts, and a preliminary determination. After consideration of public comments received, the NRC plans to issue the final supplement, in February 2022.

If you have any questions concerning the NRC's license renewal review, please contact Mr. Robert Hoffman, at 301-415-1107 or via e-mail at Robert.Hoffman@nrc.gov.

Sincerely,

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Mr. William Harris, Chief
Catawba Indian Nation
996 Avenue of the Nations
Rock Hill, SC 29730

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Harris:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Catawba Indian Nation under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

October 30, 2020

Mr. Stephen R Adkins, Chief
Chickahominy Indian Tribe
8200 Lott Cary Road
Providence Forge, VA 23140

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Adkins:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Chickahominy Indian Tribe under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Mr. Gerald A Steward, Chief
Chickahominy Indians – Eastern Division
2895 Mt. Pleasant Road
Providence Forge, VA 23140

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Steward:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Chickahominy Indians – Eastern Division under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

Delaware Nation
P.O. Box 825
Anadarko, OK 73005

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear President Dotson:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Delaware Nation under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Brooks:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Delaware Tribe of Indians under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Mr. Chuck Hoskin, Jr, Principal Chief
Cherokee Nation of Oklahoma
176 South Muskogee Avenue
Tahlequah, OK 74464

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Principal Chief Hoskin:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Cherokee Nation of Oklahoma under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Mr. Richard Sneed, Principal Chief
Eastern Band of Cherokee Indians in Oklahoma
P.O. Box 1927
Cherokee, NC 28719

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Principal Chief Sneed:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Eastern Band of Cherokee Indians in Oklahoma under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Ms. Glenna J. Wallace, Chief
Eastern Shawnee Tribe of Oklahoma
P.O. Box 350
Seneca, MO 64865

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Wallace:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Eastern Shawnee Tribe of Oklahoma under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

P.O. Box 960
Amherst, VA 24521

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW NORTH ANNA POWER STATION, UNIT NOS. 1
AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Branham:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Monacan Indian Nation under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Mr. Samuel Bass, Chief
Nansemond Indian Nation
1001 Pembroke Lane
Suffolk, VA 23434

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Bass:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Nansemond Indian Nation under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Mr. Robert Gray, Chief
Pamunkey Indian Tribe
1054 Pocahontas Trail
King William, VA 23086

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Gray:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Pamunkey Indian Tribe under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Ms. G. Anne Richardson, Chief
Rappahannock Tribe
5036 Indian Neck Road
Indian Neck, VA 23148

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Richardson:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Rappahannock Tribe under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Mr. Benjamin Barnes, Chief
Shawnee Tribe
29 South Highway 69A
Miami, OK 74355

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Barnes:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Shawnee Tribe under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Mr. Leo Henry, Chief
Tuscarora Nation of New York
2006 Mt Hope Rd
Lewiston, NY 14092

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Henry:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR) Part 54.

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Tuscarora Nation of New York under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Mr. Joe Bunch, Chief
United Keetoowah Band
of Cherokee Indians in Oklahoma
P.O. Box 746
Tahlequah, OK 74465

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Bunch:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the United Keetoowah Band of Cherokee Indians in Oklahoma under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

Electronic comments may be submitted to the NRC by accessing www.regulations.gov and searching for Docket ID NRC-2020-0201. Because there are limited personnel in NRC buildings at this time due to the COVID-19 public health emergency, the preferred method for providing your comments is through regulations.gov or through the NRC staff email contact listed below.

The NRC will hold a public environmental scoping webinar on November 4, 2020 at 1:00 p.m. to 4:00 p.m. Eastern Time. The webinar will be held online and will offer a telephone line for members of the public to submit comments. Webinar details are available in the following NRC public meeting notice: <https://www.nrc.gov/pmns/mtg?do=details&Code=20201188>.

The application is available through the web-based version of the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible at <https://www.nrc.gov/reading-rm/adams.html>. The environmental report portion of the application is listed under ADAMS Accession No. [ML20246G698](#). The NRC expects to publish a draft Supplemental Environmental Impact Statement in August 2021. The NRC will forward the draft supplement to you for your review and comment. This draft supplement will include identification of historic properties, assessment of impacts, and a preliminary determination. After consideration of public comments received, the NRC plans to issue the final supplement, in February 2022.

If you have any questions concerning the NRC's license renewal review, please contact Mr. Robert Hoffman, at 301-415-1107 or via e-mail at Robert.Hoffman@nrc.gov.

Sincerely,

Signed by Elliott, Robert

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 30, 2020

Mr. W. Frank Adams, Chief
Upper Mattaponi Indian Tribe
13476 King William Road
King William, VA 23086

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE
ENVIRONMENTAL REVIEW OF NORTH ANNA POWER STATION, UNIT NOS.
1 AND 2 SUBSEQUENT LICENSE RENEWAL APPLICATION

Dear Chief Adams:

The U.S. Nuclear Regulatory Commission (NRC) is conducting a review of the environmental effects of renewing the operating licenses for North Anna Power Station, Unit Nos. 1 and 2 (NAPS). NAPS is operated by Dominion Energy Virginia and is located primarily in Louisa County, Virginia, with a portion of the site extending into neighboring Spotsylvania County, Virginia (see Enclosure 1). Dominion Energy Virginia submitted an application for the subsequent renewal of NAPS operating licenses in a letter dated August 24, 2020, pursuant to Title 10 of the *Code of Federal Regulations* Part 54 (10 CFR Part 54).

The NRC has defined subsequent license renewal to be the period of extended operation from 60 years to 80 years. The Atomic Energy Act of 1954, as amended, authorizes the NRC to issue 40-year initial licenses, and upon application and approval, renew licenses for nuclear power reactors. The NRC's regulations limit these renewals to 20-year increments. Approval of a renewed license is based on the outcome of a safety and environmental review. The NRC issued renewed NAPS, Unit Nos. 1 and 2 operating licenses in 2003; the current Unit 1 operating license expires on April 1, 2038, and the Unit 2 operating license expires on August 21, 2040. The requested renewals would extend the operating license expiration dates for NAPS, Unit Nos. 1 and 2, to April 1, 2058 and August 21, 2060, respectively.

As part of the NRC's license renewal review, a site-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437, is prepared in accordance with 10 CFR Part 51, the NRC's environmental protection regulations. These regulations also implement Section 102(2) of the National Environment Policy Act of 1969, as amended (NEPA). In accordance with 36 CFR 800.8(c), the NRC intends to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), through the NEPA process. Accordingly, the NRC is inviting parties who may be interested in the proposed action to consult on this matter. The purpose of this letter is to initiate Section 106 consultation with the Upper Mattaponi Indian Tribe under NHPA.

In the context of NHPA, the NRC has determined that the area of potential effects (APE) for this subsequent license renewal is the area at the power plant site and its immediate environs that may be impacted by ongoing routine maintenance and operational activities during the license renewal term (see Enclosure 2). The APE may extend beyond the immediate NAPS environs if Dominion Energy Virginia maintenance and operational activities affect offsite historic properties (see Enclosure 3). This determination is made irrespective of ownership or control of the lands of interest.

Pursuant to 10 CFR 51.28 and 36 CFR 800.2(c), the NRC wishes to ensure that Indian Tribes that might have an interest in any potential historic properties in the APE are afforded the opportunity to identify their concerns. The NRC invites you to provide input to the scoping process relating to the NRC's environmental review of the subsequent license renewal application. Please provide any comments that you may have on the scope of the environmental review within a month of the date of this letter.

Written comments should be submitted by mail to:
