TRAINING: No special training is required for any documents issued with this Change Notice.

REMARKS: IMC 1245 Appendix C11, "Security Risk Analyst Technical Proficiency Training and Qualification Journal," is a major revision and has been revised to include qualification requirements for regional security risk analysts and headquarters security risk analysts. Additionally, the qualification was updated to include changes to NRC requirements regarding target sets.

IP 64704, "Fire Protection Program at Permanently Shutdown Reactors," is a major revision and has been revised to include inspection requirements on fire protection previously listed in IP 71801. Revised to include feedback from inspectors, updated the format and include editorial changes. The content of this procedure was updated to focus on the inspector's efforts on risk informing the inspection.

IP 83750, "Occupational Radiation Exposure at Permanently Shutdown Reactors," is a major revision and has been revised to refocus inspection efforts, to risk-inform the inspection and streamline the procedure based on inspector input. This revision was informed by the recently issued health physics procedures under IP 71124.

IP 84750, "Radioactive Waste Treatment and Effluent and Environmental Monitoring," is a major revision, and has been revised to refocus inspection efforts to risk-inform the inspection and streamline the procedure based on inspector input. This revision was informed by the recently issued health physics procedures under IP 71124.
