

October 8, 2020 Public Online Webinar for  
the Draft Environmental Impact Statement for  
the Proposed Interim Storage Partners  
Consolidated Interim Storage Facility – Errata

On page 116 of the October 8, 2020 public online webinar transcript (ADAMS Accession No. ML20294A435), the word “characteristic” should read “karstic” such that the corrected text is:

“When you talk about the runoff --- when the DEIS talks about the runoff to Baker Springs they do not note that some of that runoff goes to near surface karstic channels. If you go to the technical testimony for the siting of Urenco you will find a picture of the pond and the karstic caves right above the pond.”
