## General Comment

Thank you for considering public comments on the environmental issues at play in the relicensing decision on North Anna Power Station Units 1 and 2 (Docket ID NRC-2020-0201). Nuclear is crucial to our nation having a diversified portfolio of carbon-free energy sources moving forward. Additionally, North Anna does have a very good safety record and safety culture, and I know will continue to bring positive contributions to the community and the power generation industry.
