**Subject:** River Bend Unit 1 - Acceptance of License Amendment Request to Adopt GL 86-10 Standard License Condition for Fire Protection (EPID L-2020-LLA-0246)  
**Date:** Monday, November 23, 2020 12:05:00 PM

---

Bridget,

By letter dated November 2, 2020, 2020 (Agencywide Documents Access and Management System Accession No. ML20307A647), Entergy Operations, Inc. (Entergy) submitted a River Bend Station, Unit 1 license amendment request (LAR) associated with License Condition 2.C.(10), "Fire Protection (Section 9.5.1, SER and SSER 3)".

The purpose of this communication is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of this LAR. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your LAR and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed technical review and make an independent assessment regarding the acceptability of the proposed amendment in terms of regulatory requirements and the protection of public health and safety and the environment. Given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. You will be advised of any further information needed to support the NRC staff's detailed technical review by separate correspondence.

Based on the information provided in your submittal, the NRC staff has estimated that this licensing request will take approximately 140 hours to complete. The NRC staff expects to complete the review in approximately 12 months, which will be in November 2021. If there are emergent complexities or challenges in our review that would cause changes to this forecasted completion date or significant changes in the forecasted hours, the reasons for the changes, along with the new estimates, will be communicated during the routine interactions with the assigned project manager.

These estimates are based on the NRC staff's initial review of the application and they could change, due to several factors including requests for additional information, unanticipated addition of scope to the review, and review by NRC advisory committees or hearing-related activities.

If you have any questions, please contact me at (301) 415 1383 or by e-mail at [Perry.Buckberg@nrc.gov](mailto:Perry.Buckberg@nrc.gov).

Thanks,

**Perry Buckberg**
