License #: 21-32816-01, Amendment #15

Action: Modify Pending Amendment Request (Letter Dated October 27, 2020)

Dear Mr. Parker,

Per your correspondence with our Radiation Safety Officer, John Harvey, on December 9, 2020 we wish to modify our amendment request of October 27, 2020 to include two additional changes:

First, we wish to change our correspondence address (Condition 2) to 655 Fairfield Court, Ann Arbor, MI 48108. Our offices are now present in this building, so this is where we wish to receive our mail. Our radioactive material use address (Condition 10) remains 800 Technology Drive.

Second, we wish to modify the physical form of our Germanium-68 sources. Siemens has informed us that they no longer sell Model CS-6-14, and recommended Model PET-6C14/0.5 by Sanders Medical (SSDR: TN-0241-S-102-S) as a replacement calibration source for the Inveon Preclinical PET Scanner that we possess. We would like for the physical form of Ge-68 on our license to include both models, so that we can retain the decayed source until we can transfer it for disposal, as well as order its replacement another.

If you need any additional information, please do not hesitate to contact me at john.harvey@westphysics.com or (734) 678-7309.

Sincerely,

A handwritten signature in black ink that reads "John A. Harvey".
