Mark:

With this determination, BTP 7-19 is ready for issuance. I am cc'ing the BCs for their awareness since I will be out of the office next week.

Thanks and Happy Holidays.
Tekia

Wendell,

Please see OMB's e-mail below that the branch technical position, "NUREG 0800 – Branch Technical Position 7-19, Revision 8," is not a major rule under the CRA.

Please note, if there is a *Federal Register* notice or published document associated with your final action, you must cut and paste the appropriate CRA statement into your FRN and document. Approved statements are available [HERE](#) (ML13102A202).

Please complete three copies of [GAO-001](#) for Congressional review and GAO reporting. The link to the GAO-001 form provides instructions for completing the form.

Congressional correspondence is now being transmitted electronically. Therefore, please e-mail the three completed GAO-001 forms and the report to OCA for transmittal to Congress/GAO. Address your e-mail to Matina Solomakos with a cc: to Jeannette Quesenberry.

Let me know if you have any questions.

Thanks,
Angella

Thanks, Angella.

OMB determines that “NUREG 0800 – Branch Technical Position 7-19, Revision 8” is not a major rule pursuant to the Congressional Review Act.

Best,

Sofie

Hi Angella,

I see the acronym I&C used throughout this summary, but it’s never introduced. What does I&C stand for?

Thanks for your help,

SM

Subject: CRA Submission - Nuclear Regulatory Commission
Importance: High

Good afternoon, Sophie.

One CRA summary for the following action is attached for OMB **expedited** review and major/non-major determination:

- NUREG 0800 – Branch Technical Position 7-19, Revision 8

As justification for the request for expedited review, the submitter says, “management is looking to issue this document as soon as possible, based on licensees’ request to begin using this guidance in licensing action at the beginning of the year.”

Please let me know if you need additional information.

Angella
