Mr. Sharawy,

The application fee changes a bit each year. Based on the fee schedule in the regulations on our website (10 CFR Part 170.31), the application fee is \$4700. There is no reduction of the **application** fee for small business entities, to the best of my knowledge.

P.	All other specific byproduct material licenses, except those in Categories 4.A. through 9.D. ⁹ Number of locations of use: 1-5.	
	Application [Program Code(s): 02400, 02410, 03120, 03121, 03122, 03123, 03124, 03130, 03140, 03220, 03221, 03222, 03800, 03810, 22130].	\$4,700.

After a license is issued, then you would be billed for the **annual** fee every year. the current annual fee (10 CFR 171.16) is \$9700. This annual fee can be reduced if you apply annually for the small business entity. If you qualify, there is fee of \$900 for businesses that have average gross receipts less than \$485,000.

P.	All other specific byproduct material licenses, except those in Categories 4.A through 9.D. ¹⁸ Number of locations of use: 1-5. [Program Code(s): 02400, 02410, 03120, 03121, 03122, 03123, 03124, 03140, 03130, 03220, 03221, 03222, 03800, 03810, 22130]	9,700
----	---	-------

You will need to have some company name, and a location of business including a location where you will store the portable gauge. We are required to do a pre-licensing visit to inspect your facility prior to issuing a license. Part of that pre-licensing visit will require you to demonstrate that you are a viable business, including things such as a tax identification number for your business and other documents showing ownership or rental of your facilities, etc. As you can see from the definition of "person" from our regulations, we do not issue licenses to private individuals.

<i>Person means: (1) Any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency other than the Commission or the Department, except that the Department shall be considered a person within the meaning of the regulations in this part to the extent that its facilities and activities are subject to the licensing and related regulatory authority of the Commission pursuant to section 202 of the Energy Reorganization Act of 1974 (88 Stat. 1244), any State or any political subdivision of or any political entity within a State, any foreign government or nation or any political subdivision of any such government or nation, or other entity; and (2) any legal successor, representative, agent, or agency of the foregoing;</i>

I am always thankful you are most helpful

One final question what is the total fee

I know 900 for a year because I am only me
But how about the application fee. How much could that be
By the way Betsy i want to apply under my name
Is it okay or should inc. llc etc

Gratitudely
Mohamed

Mr. Sharawy,

I do not quite understand your question, so here is my best response:

- You can purchase any approved portable gauge. Troxler is one of 3-4 manufacturers of portable gauges licensed to distribute them in the USA. The NRC will issue a license for you to possess whatever make and model of gauge you intend to purchase, so long as it is one of the gauges from a manufacturer licensed in the USA to distribute portable gauges.
- If you obtain a license from the NRC, you will be required to pay the annual fee for each year that you have the license, whether or not you actually possess and use the gauge.

And also ms. Elizabeth Ullrich
Is there a fixed frame to buy from troxlers
Or is it that I can set my purchase criteria on things such as inflation, peak uses
In other words do I chose when do I have option

Subject: Portable gauge licensing

Hi ms. Elizabeth ullrich

I wanted to know if the "sealed sources" for portable nuclear gauge
Is code 22140?
Making a mistake in fee is grave
So please assist

I am a small entity in state of Connecticut.

CET Engineering Material Testing & concrete
