New Hill, NC 27562-9300

**SUBJECT: SHEARON HARRIS NUCLEAR POWER PLANT – NRC OPERATOR LICENSE
EXAMINATION REPORT 05000400/2020301**

Dear Ms. Maza:

During the period November 16 – 20, 2020, the Nuclear Regulatory Commission (NRC) administered operating tests to employees of your company who had applied for licenses to operate the Harris Nuclear Power Plant. At the conclusion of the tests, the examiners discussed preliminary findings related to the operating tests and the written examination submittal with those members of your staff identified in the enclosed report. The written examination was administered by your staff on November 24, 2020.

Five Reactor Operator (RO) and one Senior Reactor Operator (SRO) applicant passed both the operating test and written examination. One RO and one SRO applicant passed the written exam, but failed the operating test. There were no post-administration comments. A Simulator Fidelity Report is included in this report as Enclosure 2.

The initial examination submittal was within the range of acceptability expected for a proposed examination. All examination changes agreed upon between the NRC and your staff were made according to NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," Revision 11.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of the NRC's document system (ADAMS). ADAMS is accessible from the NRC Website at <http://www.nrc.gov/reading-rm.adams.html> (the Public Electronic Reading Room).

If you have any questions concerning this letter, please contact me at (404) 997-4551.

Sincerely,

/RA/

Gerald J. McCoy, Chief
Operations Branch 1
Division of Reactor Safety

U.S. NUCLEAR REGULATORY COMMISSION

REGION II

Docket No.: 50-400

License No.: NPF-63

Report No.: 05000400/2020301

Enterprise Identifier: L-2020-OLL-0029

Licensee: Duke Energy Carolinas LLC

Facility: Shearon Harris Nuclear Power Plant

Location: New Hill, NC

Dates: Operating Test – November 16 – 20, 2020
Written Examination – November 24, 2020

Examiners: M. Bates, Chief Examiner, Senior Operations Engineer
P. Capehart, Senior Operations Engineer
A. Goldau, Operations Engineer

Approved by: Gerald J. McCoy, Chief
Operations Branch 1
Division of Reactor Safety

SUMMARY

ER 05000400/2018301; operating test November 16 – 20, 2020 & written exam November 24, 2020; Shearon Harris Nuclear Power Plant; Operator License Examinations.

Nuclear Regulatory Commission (NRC) examiners conducted an initial examination in accordance with the guidelines in Revision 11 of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." This examination implemented the operator licensing requirements identified in 10 CFR §55.41, §55.43, and §55.45, as applicable.

Members of the Shearon Harris Nuclear Power Plant staff developed both the operating tests and the written examination. The NRC developed the written examination outlines. The initial operating test, written Reactor Operator (RO) examination, and written Senior Reactor Operator (SRO) examination submittals met the quality guidelines contained in NUREG-1021.

The NRC administered the operating tests during the period November 16 – 20, 2020. Members of the Shearon Harris Nuclear Power Plant staff administered the written examination on November 24, 2020. Five RO and one SRO applicant passed both the operating test and written examination. One RO and one SRO applicant passed the written exam, but failed the operating test. Six applicants were issued licenses commensurate with the level of examination administered.

There was no post-examination comments.

No findings were identified.

REPORT DETAILS

4. OTHER ACTIVITIES

4OA5 Operator Licensing Examinations

a. Inspection Scope

The NRC evaluated the submitted operating test by combining the scenario events and JPMs in order to determine the percentage of submitted test items that required replacement or significant modification. The NRC also evaluated the submitted written examination questions (Reactor Operator (RO) and Senior Reactor Operator (SRO) questions considered separately) in order to determine the percentage of submitted questions that required replacement or significant modification, or that clearly did not conform with the intent of the approved knowledge and ability (K/A) statement. Any questions that were deleted during the grading process, or for which the answer key had to be changed, were also included in the count of unacceptable questions. The percentage of submitted test items that were unacceptable was compared to the acceptance criteria of NUREG-1021, "Operator Licensing Standards for Power Reactors."

The NRC reviewed the licensee's examination security measures while preparing and administering the examinations in order to ensure compliance with 10 CFR §55.49, "Integrity of examinations and tests."

The NRC administered the operating tests during the period November 16 – 20, 2020. NRC examiners evaluated six RO and two SRO applicants using the guidelines contained in NUREG-1021. Members of the Shearon Harris Nuclear Power Plant staff administered the written examination on November 24, 2020. Evaluations of applicants and reviews of associated documentation were performed to determine if the applicants, who applied for licenses to operate the Shearon Harris Nuclear Power Plant, met the requirements specified in 10 CFR Part 55, "Operators' Licenses."

The NRC evaluated the performance or fidelity of the simulation facility during the preparation and conduct of the operating tests.

b. Findings

No findings were identified.

The NRC developed the written examination sample plan outline. Members of the Shearon Harris Nuclear Power Plant staff developed both the operating tests and the written examination. All examination material was developed in accordance with the guidelines contained in Revision 11 of NUREG-1021. The NRC examination team reviewed the proposed examination. Examination changes agreed upon between the NRC and the licensee were made per NUREG-1021 and incorporated into the final version of the examination materials.

The NRC determined, using NUREG-1021, that the licensee's initial examination submittal was within the range of acceptability expected for a proposed examination.

Five Reactor Operator (RO) and one Senior Reactor Operator (SRO) applicant passed both the operating test and written examination. One RO and one SRO applicant passed the written examination, but failed the operating test. Five RO applicants and one SRO applicant were issued licenses.

Copies of all individual examination reports were sent to the facility Training Manager for evaluation of weaknesses and determination of appropriate remedial training.

The facility licensee and applicants submitted no post-examination comments. A copy of the final RO and SRO written examinations and answer keys, with all changes incorporated, may be accessed not earlier than December 7, 2022, in the ADAMS system (ADAMS Accession Number(s) ML21004A235 and ML21004A236).

4OA6 Meetings, Including Exit

Exit Meeting Summary

On November 20, 2020, the NRC examination team discussed generic issues associated with the operating test with Ms. Kim Maza, Site Vice President, and members of the Shearon Harris Nuclear Power Plant staff. The examiners asked the licensee if any of the examination material was proprietary. No proprietary information was identified. On January 5, 2021, the NRC discussed the results of the examination with members of the Shearon Harris Nuclear Power Plant staff.

KEY POINTS OF CONTACT

Licensee personnel

K. Maza, Site Vice President

J. Dills, Plant Manager

W. Gunter, Operations Manager

D. MacDougall, Assistant Operations Manager - Support

S. Cahill, Training Manager

A. Rucker, ILT Program Superintendent

M. Fulks, LOCT Program Superintendent

S. Rua, AOTP/Regulated Exam/Simulator Support Superintendent

S. McDaniel, Sr. Nuclear Engineer, Regulatory Affairs

R. Horton, Operations Training Instructor

J. Gregitis, Operations Training Instructor

SIMULATOR FIDELITY REPORT

Facility Licensee: Shearon Harris Nuclear Power Plant

Facility Docket No.: 05000400

Operating Test Administered: November 16 – 20, 2020

This form is to be used only to report observations. These observations do not constitute audit or inspection findings and, without further verification and review in accordance with Inspection Procedure 71111.11 are not indicative of noncompliance with 10 CFR 55.46. No licensee action is required in response to these observations.

One simulator discrepancy was observed and placed into the facility's simulator corrective action program as:

SSR 20-227 RCP Vibration Malfunction not seen on Bentley Nevada Meter.
