LISLE, ILLINOIS 60532-4352

JAN 11 2021

Jane Smith
Radiation Safety Officer
Indiana Department of Homeland Security (IDHS)
Indiana State Department of Health (ISDH)
Office of State Fire Marshal / HazMat
Indiana Government Center South (IGCS)
302 W. Washington St., E-241
Indianapolis, IN 46204

Dear Ms. Smith:

Enclosed is Amendment No. 13 to your NRC Material License No.13-06028-02 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions.

If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You may also contact me at (630) 829-9841. My fax number is (630) 515-1078 and my email address is colleen.casey@nrc.gov. The most reliable way to contact me is via email.

We have changed the Radiation Safety Officer (RSO) on this license to you, as requested in the application dated October 19, 2020, signed by Joel Thacker and Steven Cox. We also made the other changes requested to this license.

However, we noted that contact information for you, as the new RSO, was lacking.

Within 30 days of the date of this letter (by close of business on February 12, 2021) please provide only one response to the items below. If additional time is needed to respond, please contact me at colleen.casey@nrc.gov to make alternative arrangements.

Please only send us one complete, written, currently dated and legibly, physically signed (by an appropriate senior management official) correspondence document, such as either an NRC Form 313 or a business-style letter containing the same information as an NRC Form 313a.

Please ensure that only one correspondence letter is used that shows both the date and the signature of the senior management official, in contrast to the two separate, incomplete correspondence letters initiating this request.

Please ensure that the requested information is answered completely and accurately.

J. Smith

Please do not send multiple copies of responses and please do not submit any information that is identical to what you have already sent us unless we direct you to do so. If you resubmit such information for the sake of adding context and other details to enhance its meaning, that is acceptable.

Please do not email a PDF document to me, and transmit a faxed version, and/or a hard copy sent by mail. Only one copy transmitted in only one of these ways is appropriate to prevent administrative processing errors, although emailing a PDF document is the least efficient mechanism for responding to me.

The most reliable and fastest way to respond is to send a fax of one complete copy only to me at (630) 515-1078.

Please address your written response to my attention as "additional information to control number 623362" to facilitate proper handling in our offices.

The contact information lacking for you consists of your primary direct telephone number, your alternate telephone number, fax number and email address. Please respond by providing this information.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

J. Smith

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Carol Casey".

Colleen Carol Casey
