From the template that I had and the SQN spreadsheet, there's about half the data that's not there.

I know that the VTRG Chairman and GE sent them a copy. I do not know if it was formal or not.

Do you know (or can you find out) if Rev 4 of the BWROG guidance was formally docketed to NRC?

If it was, I'd like to have the NRC ML number for a reference.

Thanks.....

TVA External Message. Please use caution when opening.

VTRG Committee

A question arose today regarding the upcoming Dec 31 NRC submittal for the A/D DDGVs regarding what is meant by active safety function valves (ie, do we need to include valves that only have a pressure boundary safety function)? The answer to this is no. Because the valves are not required to respond to an design basis accident by a change of position, these pressure boundary only valves would not be considered active and, as such, would fall outside of the scope of the upcoming submittal.

Please let me know if there any questions.

Thnaks,

Brian Kibler PE
