Michael,

I'd like to thank you for your time and patience throughout the NRC remote inspection of your licensed activities based out of San Diego, California, from February 2 – 12, 2021. As I explained during our exit briefing today, the NRC has determined that no violations of greater-than-minor significance were identified. In the NRC determined that there was a sufficient basis to close the Severity Level IV violation from the NRC's 2015 inspection, regarding the failure to amend the license to address the change in the named Radiation Safety Officer. The attached NRC Inspection Report (NRC Form 591M) documents the results of the inspection. This does not require you to take any action and you are not required to sign the document or return it. I do however request a courtesy email response from you acknowledging receipt.

If you have any questions or concerns, please do not hesitate to contact me,
