Mike: The staff will continue to develop the Part 53 rule on the schedule provided by the Commission in their October 2020 letter [SRM-SECY-0032](#). We do plan to address some of the key comments provided by stakeholders on the previously released preliminary proposed rule language during the March 2021 public meeting.

Let me know if you have any additional questions.

Thanks.....

Bob,

In light of the USNIC's presentation during the Feb 4, 2021 stakeholders meeting, is the NRC staff going to hit the "pause" button and modify the draft 10CFR53 before proceeding further?

Regards,

Mike
