

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

March 23, 2021

MEMORANDUM TO: Sabrina D. Attack, Director  
Division of Security Operations  
Office of Nuclear Security and Incident Response

FROM: Steve R. Ruffin, Acting Chief  Signed by Ruffin, Steve  
Security Performance Evaluation Branch on 03/23/21  
Division of Security Operations  
Office of Nuclear Security and Incident Response

SUBJECT: SUMMARY OF KEY OBSERVATIONS AND LESSONS-LEARNED  
FOR THE 2020 FORCE-ON-FORCE INSPECTION PROCEDURE  
92707 ACTIVITIES

Due to the COVID-19 Public Health Emergency, the NRC modified or deferred many of its planned inspection activities, including the triennial force-on-force (FOF) inspection conducted under Inspection Procedure (IP) 71130.03. For 2020, IP 92707 was developed which implements multiple limited-scope tactical response drills that verify and assess specific key elements of the licensee's protective strategy while also addressing continued safety concerns for NRC inspectors and licensee employees. Enclosed is the summary of key observations and lessons-learned from the 2020 FOF IP 92707 activities.

Enclosure  
Summary of Key Observations and Lessons-Learned

CONTACT: Rebecca Stone, NSIR/DSO/SPEB
