CLASSIFICATION: UNCLASSIFIED

Good Afternoon Robin,
Following up on our phone conversation, I wish to inform that DHA anticipates completing the SAVs that are due by march 2021. At this juncture, kindly disregard our extension request. Should anything change, I will inform you accordingly.

Thank you for your help with this.

Hi Shabbir,

I have been assigned your extension request. I called and left a message on your phone. Please call me at your earliest convenience to discuss your request.

Thank you,
Robin

Subject: [External_Sender] Site Assessment Visits by DHA

Good afternoon Robin,

Further to our conversation, it is the DHA Rad safety team's consensus that a virtual Site Assessment Visit is not a viable alternative to an in-person SAV. In light of the same, DHA wishes to submit an extension to the NRC for the SAVs that are coming due (30 months).

In preparing its submission, DHA wishes to inquire if a 180 day extension for SAVs has is a reasonable request in light of Covid related hurdles?

For your reference:

Administrative Instruction 87, a tie-down document for DHA's NRC license, specifies that the DHA Director of Radiation Safety (DHA RSO) will:

" i. Provide or coordinate periodic site assistance visits to all DHA facilities operating under the DHA NRC License.

Frequency of visits will be based upon program complexity, relative risk of safety, and site compliance with internal and external audits. Site visits will not exceed every 30 months with goal of visitation every 24 months."

Thank you in advance.
