

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

April 9, 2021

MEMORANDUM TO: Joshua Borromeo, Chief  
Containment, Thermal, Chemical, and Fire Protection Branch  
Division of Fuel Management  
Office of Nuclear Material Safety and Safeguards

FROM: Leslie Perkins, Project Manager */RA/*  
Licensing Projects Branch  
Division of Operating Reactor Licensing  
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF MARCH 9, 2021, CLOSED MEETING WITH HOLTEC  
INTERNATIONAL AND U.S. NUCLEAR REGULATORY  
COMMISSION REGARDING TOPICAL REPORT FOR ALLOWANCE  
OF HEAT LOAD PATTERNS IN HI-STORM 100 AND HI-STORM FW  
SYSTEMS

On March 9, 2021, the U.S. Nuclear Regulatory Commission (NRC) staff held a closed meeting with representatives from Holtec International (Holtec). The purpose of this meeting was for Holtec and NRC staff to discuss the draft safety evaluation (SE) with open items for the Topical Report for Allowance of Heat Load Patterns in Hi-Storm 100 and Hi-Storm FW Systems. The meeting was noticed on February 26, 2021, and is available at the Agencywide Documents Access and Management System (ADAMS) Accession No. ML21057A313.

During the meeting, Holtec representatives and NRC staff discussed the open items identified in the NRC staff's draft SE with open items. Holtec representatives discussed how they planned to address each open item to confirm their understanding of what was needed to close each open item. The NRC staff provided clarification on a couple of the open items in the draft SE. As a result of the discussion, there was alignment regarding the path forward for closing out the open items identified. Holtec will formally submit its responses to the open items for the NRC staff review to resolve the open items. Holtec representatives indicated that they would let the NRC staff know when they plan to submit the responses to the open items.

A list of the attendees is enclosed.

Docket Nos. 72-1014 and 72-1032

Enclosure: As stated
